

Backup solutions

powered by

Data

is today's most valuable **commodity** and is at the very core of everything we do.

But accidents occur, and machines eventually break down...

The prospect of losing your data is unthinkable, it could interrupt your operations with heavy financial & reputational consequences. Is it worth the risk?

At Byte Computer, we offer cost-effective customized & standard backup solutions tailored to your needs with Microsoft Azure Backup, whether on-premises or cloud.

Backup solutions for your Azure-based infrastructure

Cost-effective backup solution for your on-premises infrastructure

Backup solution for your branch offices

Managed services solution for your backup

Why us?

Byte was founded in **1983** and became very soon the **market leader** of IT and communications solutions in Greece. We are a **Microsoft Gold partner** with several cloud competences and decades of Microsoft Cloud solutions experience. Our team of **MS Certified Azure Architects and MCPs** can cover all your Azure Cloud related needs, with the superior quality and reliability of **Microsoft**.

Azure Backup key advantages

-  **Physical & virtual:** we provide solutions for your needs whether on-premises or Azure based infrastructure.
-  **Easy to learn:** intuitive central management, no expert knowledge required.
-  **Long term backup:** some of our retention policies go beyond 99 years!
-  **Pay-as-you-go:** you only pay for what you are actually using, à la carte.
-  **No extra Azure charges for data transfers:** convenience in a smart way.
-  **No need for expensive on-premises backup infrastructure (storage, tape library):** affordable solutions that make it a no-brainer decision.
