# Bytes Azure Security JumpStart

The head start that the agility of cloud projects requires

In the day and age of evolving security threats you need to ensure you are adopting a best of breed security solution to protect your assets in the Microsoft Azure Public Cloud.

Get help from expert security consultants to meet your cloud security challenges. Ensure your Microsoft Azure cloud has effective security built in from the start with our Cloud Security JumpStart. Our Professional Consultants offer full design, implementation and setup of your Cloud security solution – ensuring your Microsoft Azure cloud protection is fully operational quickly, without hassle or delays.

75% of enterprises are very or extremely concerned about how secure they are in the cloud

How it works

Review your needs

An expert cloud security consultant works with you to understand the cloud, productivity & security needs of your business.

Best Practice Security Design & Deployment

Our consultants keep security best practices in mind whilst deploying security enforcement at the perimeter.

Best of breed technologies deployed

Bytes leverage best of breed threat prevention solutions to enhance the native tools of your Microsoft Azure public cloud environment.

Long term support

Post deployment, ongoing access to Bytes Technical Support desk for technical support questions and queries as your cloud estate evolves.

Is it the right service for me?

The solution is purpose built for organisations...

✔ ...at the beginning of their cloud strategy

✔ ...whose cloud projects require speed and simplicity

✔ ...who need a high standard of security with a simple but effective solution

✔ ...familiar with firewall products and the way they work

✔ ...needing more visibility and functionality than cloud native standard toolsets

✔ ...requiring a resilient, fault-tolerant solution

How it works

Good planning and implementation is a crucial part of success.

Through a three-step engagement, including **deployment, build, and the training of administrators,** Bytes will ensure successful deployment, allowing customers to maximise and maintain cloud security ongoing.

Plus, you have the peace of mind ongoing that comes from **24/7 Direct-to-Engineer Technical Support from Bytes fully accredited, experienced 3rd line support team** – experts in your corner to ensure security strength & ease of management.

This service is designed to ensure successful deployment and means you reap the full benefit from your Cloud Security investment for Microsoft Azure quickly.
