Equip your organization with insights, strategies, and tools to fortify defenses, protect endpoints, and enhance overall security readiness across your digital estate.

Endpoint Management Modernization with Security Workshop.

Engagement highlights

Learn about how Microsoft Intune can help to enhance your endpoint security.

Unveil the benefits of the Secure Score and Microsoft 365 Defender.

Map identified threats and vulnerabilities to specific solution recommendations

Review Next Steps, recommendations for remediation.

In an era of escalating sophisticated threats targeting vital assets, recognizing, and countering risks is paramount for organizations. One "gap" in your organization's security posture can be used by a malicious threat actor to compromise your environment.

In today's dynamic workplace, marked by widespread remote work adoption and escalating endpoint management complexity, businesses grapple with critical challenges. Traditional endpoint solutions struggle to keep pace with evolving cyber threats, leaving organizations vulnerable to data breaches.

Improve your Security Posture and increase your Security Readiness.

Organizations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling an **Endpoint Management Modernization with Security Workshop.**

We can help you develop a strategic plan customized for your organization and based on our findings during this workshop. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to remediate vulnerabilities and upgrade your security posture for the long term.
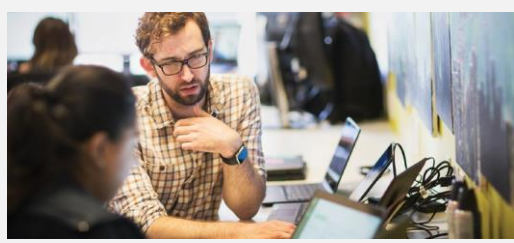

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, endpoint management best practices, and how to mitigate and protect against threats moving forward. By attending this engagement, you can:

Identify current, ongoing security threats and discover vulnerabilities in your environment.

Learn about best practices for Endpoint Management Modernization.

Walk away with actionable next steps based on your specific needs and objectives.

Better understand how to accelerate your security journey using the latest Microsoft Security tools.
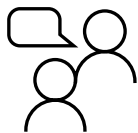

What to expect:

During this engagement, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Analysis of cybersecurity threats that are found targeting your organization.

- We will show you how modernizing endpoint management with **Microsoft Intune** delivers robust security benefits by enabling centralized control and efficient management of devices.

- Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.

- Gain visibility into the vulnerabilities within your Microsoft 365 cloud using the **Microsoft Secure Score, and Microsoft 365 Defender** to better understand, prioritize and address vulnerabilities and misconfigurations across your organization.

- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.
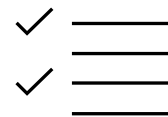

| Pre-Engagement Call	Kick-off Meeting	Modernizing Endpoint Management Discussion	Threats and Vulnerabilities Exploration	Results Presentation	Engagement Decommissioning

Who should attend

The engagement is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)

- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

Why C1st Technologies?

As your dedicated Information Security Partner, C1st Technologies will guide you through this transformational journey. Together, we'll navigate the intricacies of security recommendations, benchmarks, actionable insights, and endpoint management. C1st Technologies excels in IT Security with expertise, innovation, and a commitment to safeguarding your organization.
