IT HARDWARE & SOFTWARE PROCUREMENT

Testimonials

Excellent Customer Service

From beginning to end, C1st was on the ball. During implementation there was solid communication, no interference with user until it was planned (like setting everyone up on MFA) and the implementation went off without a hitch! All our solutions work with no issues. I'm glad the C1st engineering team worked with me on a Saturday to help setup our security correctly.

Law Firm Customer

Dependability

We started off dealing direct to Microsoft which was the worst experience possible. The accounting team for Microsoft did not track our payments correctly which caused many lost hours by our AP and IT departments. I finally got management to move our Office 365 to C1st. From that moment on our payment details have been corrected and C1st makes adding services and licenses so simple. They even showed us a licensing option that is saving us close to $2000 a month!

ISP Customer

Urgency

Greenleaf Hospital Group encountered a serious problem with one of our domain controllers after patching our servers. We immediately reached out to C1st for help, and we received a response the same day. Our issue was resolved in a timely manner and we are very grateful that we have C1st and their team at our disposal.

Hospitality Customer
