

# Contractual Risk Management with AI

Contractual Risk Management enables the extraction/reading of sections/entities and their clauses from RFQ/contract/Agreement documents with the help of Azure form recognizer, Open AI services and Document Artificial Intelligence. By applying these services, it enables human-like interpretation over the content in contract documents.

Contractual Risk Management solution showcases significant progress in extracting information from contracts (RFQ's, RFP; s, Statement of work, supply contracts) PDF documents and generating relevant questions and answers.
