Assess six key domains of readiness toward adopting Generative AI through Copilot.

About Cadence Solutions:

Cadence Solutions is a private, specialized consulting provider located in Edmonton, Canada. Our focused experience in data protection and content management makes us one of the leading voices in the push for better governance and improved usage of Microsoft 365 tools.

What we offer

Copilot has burst on the scene with a series of useful, attractive features that will increase productivity. Copilot trains itself on your data to truly tailor its experience. The process of training is both useful and risky, and it is important to look carefully at your Copilot adoption plans to reduce that risk.

We believe that an organization's true "readiness" for Copilot spans six key domains, including but not limited to Change Management and Governance.

Cadence Solutions offers a Copilot Readiness Assessment which performs a diagnostic of your environment and of your organization to determine if you are ready for Copilot. The 150+ domain assessment results in a tailored roadmap that you can use to move toward successfully deploying Copilot to your organization.

What our customers are saying

"The readiness assessment allowed us to gain insights into the gaps in our governance and identify some key issues that we needed to resolve before turning on our Copilot Licenses. This really helped draw attention to the issue of governance across our organization!"

– Data Executive, Large Public Sector Organization

Why Microsoft 365?

Save your company money

Microsoft 365 is available as a simply, monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

Key use cases

Business-class email
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

Cloud storage
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

Meet online
Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

Collaborate, chat privately
Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

Microsoft 365

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.
