

**Offer Name** = Custom Cloud Application Briefing

**Calian Digital Solutions Ltd. (CDS)**

**Summary/The purpose of this engagement =**

Evolve your business by building a system that fits your needs. Enhance performance, improve scalability, and integrate cutting-edge technologies in your custom cloud application.

**Description=**

Calian Digital Solutions has a proven track record of building software using containerized, service-oriented architectures that leverage Azure cloud services and cutting-edge technologies. Our architectural focus ensures that your solution scales with your business and performs up to your expectations.

We offer a complimentary 2-hour briefing and consultation to understand your needs and goals. During this session, we'll review your project specifics, technology stack, and deployment preferences, identifying any potential challenges.

**Proposed Agenda:**

- Define Application objectives
- Assess current infrastructure, technology stack, and system deficiencies
- Identify key project areas and relevant Microsoft Azure solutions/components
- Discuss integrations with external/internal systems
- Review business intelligence and reporting needs
- Q&A Session
