

Unlock the Value of Your Legacy Recording Data

CallCabinet empowers organizations to liberate and leverage recorded voice data trapped in legacy or proprietary systems. Take full ownership of your data and unlock its immense business intelligence potential – all while ensuring compliance and security in the cloud.

Many organizations have years of call recordings locked away in on-premise systems or restricted by proprietary formats. CallCabinet securely extracts, migrates, and transforms this data into a unified, cloud-based repository, ensuring accessibility, compliance, and future-ready analytics.

Own Your Data. Gain a Competitive Advantage.

Do you have both a legacy on-prem system and a cloud call recording solution?

There's a common misconception that legacy on-premise recordings can't be extracted from proprietary systems – forcing businesses into costly hybrid environments.

The reality? Your data can be set free. CallCabinet has perfected the secure migration of existing voice data to the cloud – ensuring 100% compliance and security every step of the way.

Is your legacy voice data valuable?

Absolutely. Migrating to the cloud unlocks its full potential.

Keeping legacy recordings in outdated storage risks data loss, compliance violations, and inefficiencies when searching for specific calls during audits or disputes.

Migrating with CallCabinet means:

- Eliminating compliance risks associated with lost or inaccessible data.
- Automated call tagging, searching, and quality assurance.
- Next-gen AI-powered conversation analytics.
- Improved agent evaluation and training.

Beyond Storage: What Cloud Migration Really Offers

A Future-Proof Solution

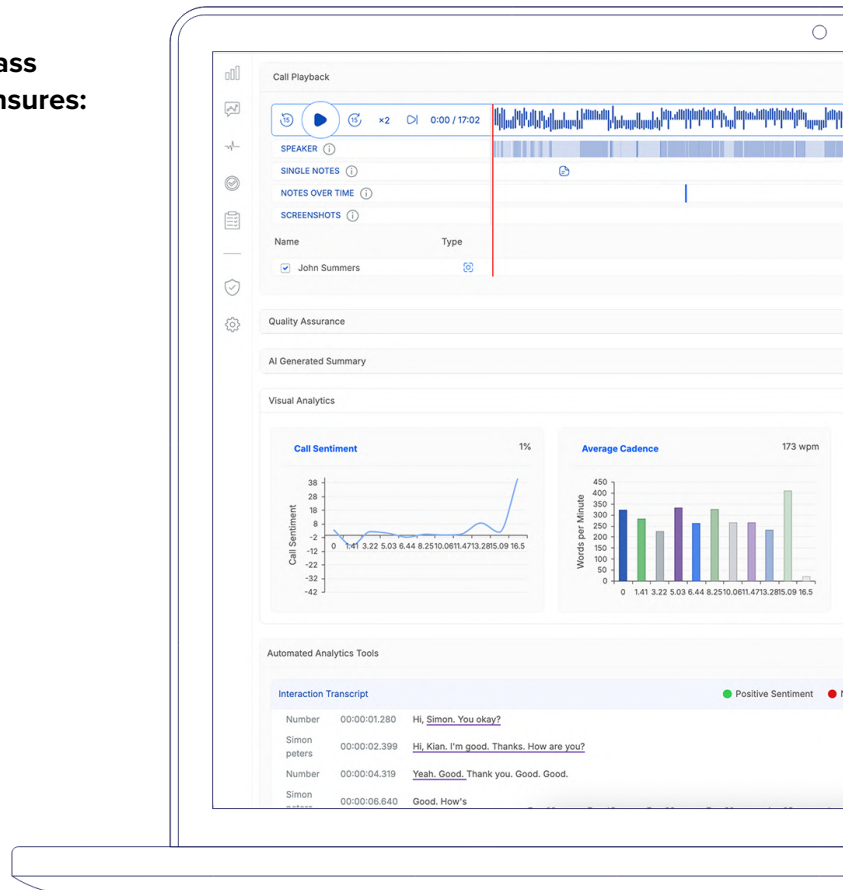

The cloud continuously evolves to offer best-in-class security, scalability, and accessibility. Migrating ensures:

- Stronger security than traditional on-premise storage.
- No storage volume limitations – scale effortlessly.
- Instant accessibility anytime, anywhere.

More Than Just Data Storage – It's a Business Intelligence Engine

Cloud migration allows businesses to do more with their recorded conversations:

- Improve customer experience with AI-driven insights.
- Enhance call quality assurance with real-time monitoring.
- Mine valuable business intelligence to optimize decision-making.

How CallCabinet Frees Your Voice Data

How long does migration take?

CallCabinet's advanced migration system ensures efficient, structured voice data transfer, transforming legacy recordings into a normalized, cloud-based format.

The process varies depending on data volume, but it's significantly faster and more cost-effective than alternative methods.

Our Proven Data Migration Process

- 1 Data Collection :** We copy archived data to a secure location, identifying any damaged or unreadable files.
- 2 Metadata Extraction :** Raw data is reconstructed into structured call records.
- 3 Audio Processing :** Audio is extracted from tape, disk images, or file storage.
- 4 Standardization:** Audio is transcoded into universally compatible formats.
- 5 Extended Metadata Extraction :** Additional call details are retrieved from relational databases.
- 6 Cloud Migration:** Audio and metadata are securely transferred to CallCabinet's cloud for full compliance and advanced analytics.

Guaranteed Compliance Across All Global Regulations

CallCabinet ensures strict adherence to industry compliance requirements, including:

Regulatory Bodies:

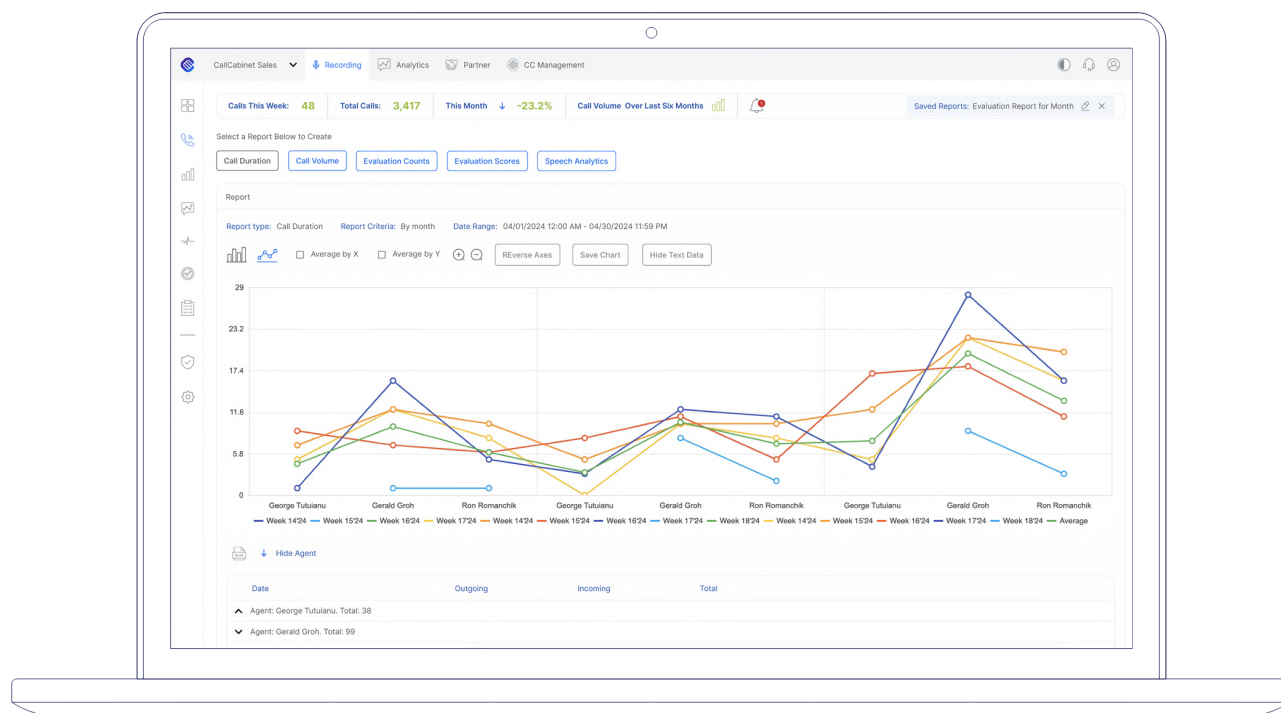

SEC (USA) | CFTC (USA) | FCA (UK) | FSC (South Korea) | CSRC (China) | ASIC (Australia) | PCI DSS (Global) and other data security mandates.

- **Data Security & Retention** – All recordings are encrypted and stored with policy-driven retention.
- **Global Compliance** – Our migration process meets the highest industry and regulatory standards.
- **Audit-Ready** – Make compliance audits effortless with automated documentation and searchability.

The Outcome: Your Data, Fully Unlocked!

- Migrate and centralize years of recorded conversations.
- Transform voice data into actionable intelligence.
- Drive business insights that improve performance & revenue.

REMEMBER: The cloud doesn't just store data – it elevates it, enabling compliance, analytics, and strategic decision-making like never before.
