

SharePoint to Azure Files - Assessment

Has your organization outgrown SharePoint for file storage? If you are using over **1 TB** of SharePoint storage, you could reduce your cost up to 3x by switching to Azure Files.

SharePoint Limitations	Common scenarios that have this challenge
<ul style="list-style-type: none">• 25 TB max storage• 250 GB max file size• Sync issues when Document Libraries hit 300,000 documents	<ul style="list-style-type: none">• CAD Files• Render Farms• Video Storage• Photo Libraries

Solution

Starting at **\$0.06/GB**, Azure Files is a fully managed Cloud File Share solution that can replace your existing SharePoint document libraries. Users will be able to access their files using a mapped drive over SMB, just like previous versions of Windows file shares.

Cambay Consulting's professional services will assess and evaluate whether migration from SharePoint to Azure Files for storage is right fit for your organization.

2-Day Assessment

Cambay's global team of Azure experts will work with you to understand and document your current SharePoint environment. After we have identified requirements specific to your environment, we will put together a comprehensive plan of action to move your workload to Azure Files while also helping to determine both the cost of remaining in SharePoint and moving to Azure Files.

At Cambay, we have developed our assessment and migration tool for SharePoint to Azure Files migrations, allowing us to deliver projects with speed and precision. This way, you can take advantage of our upfront investment and make the right decision for your organization's long-term vision.

Deliverables

SharePoint requirements gathering and analysis.

Azure Files recommendations and walkthrough

Comprehensive documentation - Current SharePoint libraries

Projected TCO of moving SharePoint libraries to Azure Files

Recommendation - Fitment of Azure Files to your organization
