

**FLEXIBLE WAREHOUSE  
MANAGEMENT SOLUTIONS  
FOR GROWING 3PLS**

# Our Job is to Make Your Job Easier

## LEVERAGING THE RIGHT TECHNOLOGY TO MANAGE AND GROW YOUR 3PL BUSINESS

It's an exciting time to be a 3PL! Supply chain has never been as important as it is today with logistics outsourcing becoming an integral part of corporate strategy. Consumers expect free, one-day (or same-day) delivery and companies must comply to compete. Shippers are increasingly relying on their 3PL partners to meet these demanding services levels, while at the same time reducing costs. The right technology is mandatory.

Camelot 3PL Software provides an integrated suite of applications to efficiently manage an enterprise-level, multi-client warehouse operation. Built within the **Microsoft Dynamics NAV** ERP platform, the Camelot Solutions combine the strengths of Microsoft's enterprise software leadership, together with the 30+ years history of Camelot's focus on 3PL warehouse operations software to provide the most robust, easy-to-use warehouse management system on the market.

- Specifically Designed for 3PL Operations
- Real Time Inventory Visibility
- Billing and Invoicing Capabilities
- Inventory and History Reporting
- Customer Web View of Inventory
- E-Commerce Fulfillment
- Kitting

## two robust options to fit your business

### EXPRESSWMS

Smaller 3PL warehouses sometimes need a warehouse management system that allows for "the basics" now but with the ability to seamlessly transition into an advanced system as the business grows. The Solution: **Express WMS** a cloud-based solution for single-location warehouses with fewer than 5 users and less advanced reporting requirements.

#### Features Include:

- Microsoft Dynamics NAV License
- Inventory Management
- Cloud (SaaS) Access
- Multi-client Billing & Invoicing
- Inventory & History Reporting
- Basic Physical Count Reports
- Basic Customer Web View
- Optional Accounting Interface
- Optional Wireless Barcode Scanning

Camelot Express WMS is a "lite" WMS for public warehouses that need a robust system but aren't ready for the larger time and financial investment of an advanced WMS. Since Express WMS is built on the same platform as Excalibur WMS, the transition to upgrade is seamless.

### TECHNOLOGY THAT LETS YOU MANAGE YOUR OPERATION YOUR WAY

Camelot's **Excalibur WMS** is a complete warehouse management solution developed exclusively for 3PLs, public warehouses and fulfillment operations. Camelot Excalibur WMS is available as both a cloud-based solution or an on-premise solution. Because of its modular

design, the system can be configured with only the necessary components, resulting in quicker implementation and a lower total cost structure. As the business grows, new modules (see right) can be added quickly and easily.

Excalibur WMS provides all stakeholders with complete visibility across the entire operation, including a robust customer web portal with real-time inventory and job status information.

The ever-increasing demands to meet higher service levels while simultaneously lowering costs with optimized space and workforce utilization can only be achieved with a powerful and versatile warehouse management system. Excalibur WMS is ready to meet the challenges today and adapt as your business grows.
