

HorizonAX Activate

Unlock the Power of Your Enterprise Knowledge with AI

Why Horizon AX Activate

Your enterprise knowledge is your biggest untapped asset. Scattered across documents, systems, and data silos, this information holds the key to transformation. HorizonAX Activate enables you to make your data AI-ready and fine-tune LLMs with your proprietary knowledge, unlocking competitive advantage, faster decisions, and smarter operations.

Unlock Competitive Advantage

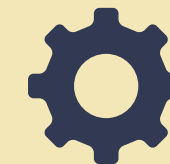

Turn your proprietary knowledge into an exclusive AI-powered asset.

Enable Faster Decisions

Equip teams with domain-specific AI to get answers and insights instantly.

Drive Smarter Operations

Automate complex tasks and streamline workflows with AI that speaks your enterprise's language.

Client Pain Points

Untapped Enterprise Knowledge

Your enterprise knowledge is your biggest untapped asset, scattered across documents, systems, and data silos.

Data Is Not AI-Ready

Enterprises are starting with raw, messy data instead of the clean, structured, AI-ready datasets required for modern AI.

Generic AI Lacks Enterprise Context

Standard large language models don't speak your enterprise's language, limiting their effectiveness for domain-specific needs.

Make Your Data AI-Ready

Transform your raw, messy data into clean, structured, AI-ready datasets with these powerful features.

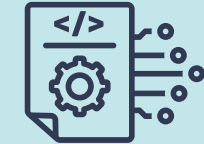

Data Normalization & Content Extraction

Converts diverse formats into a unified structure and captures valuable information from PDFs, Word, and spreadsheets.

Multi-Source Integration

Connects to your enterprise systems, cloud storage, and third-party apps.

Metadata Enrichment

Adds critical context to your data with timestamps, sources, and tags.

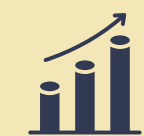

Deduplication & Version Control

Eliminates redundancy and ensures the accuracy of your information.

Traceability & Compliance

Provides complete audit logs for enterprise trust and regulatory needs.

Scalability

Built to handle large datasets efficiently and in parallel.

Fine-Tune LLMs with Your Data

Fine-tune LLMs with your proprietary knowledge and build AI that speaks your enterprise's language.

No-Code Setup

Easily configure your model type, task, and training parameters without writing a single line of code.

Flexible Training

Supports a wide range of tasks including QA, summarization, classification, embeddings, and custom workflows.

Enterprise-Grade Infrastructure

Leverage automatic cloud and GPU provisioning for robust, scalable training environments.

Optimized Training

Save on costs with advanced techniques like quantization, distillation, and distributed training.

Deployment Ready

Easily export your custom models to APIs, containers, or integrate them into existing enterprise workflows.

Visual Dashboards

Monitor accuracy, and utilization in real-time, all while ensuring enterprise security with IAM, encryption, and compliance at every step.

Not Just Better—Smarter.

Discover the core principles that set HorizonAX Activate apart and ensure your AI initiatives succeed at scale.

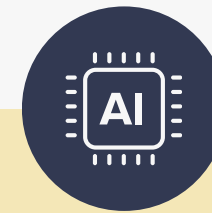

END-TO-END AI ENABLEMENT

We cover the entire lifecycle, from data preparation to AI deployment.

BUSINESS FRIENDLY

Our platform is designed for both technical and non-technical users.

FUTURE-PROOF

We support evolving LLM families and new tasks, ensuring your investment lasts.

SCALABLE & SECURE

Our solution is built from the ground up for enterprise trust and global scale.

See the Difference. Feel the Growth.

Discover the core principles that set HorizonAX
Activate apart and ensure your AI initiatives
succeed at scale.

Before

- Enterprise knowledge was scattered and untapped
- Data was raw and messy, not ready for AI
- Decisions were slow, lacking AI-powered insights
- Innovation was hindered by a lack of domain-specific AI

After

- Data is clean, structured, and AI-ready
- LLMs are fine-tuned with proprietary enterprise knowledge
- Decisions are faster and operations are smarter
- Your enterprise has turned scattered knowledge into a competitive advantage

Empowering Your Key Teams to Drive Growth

For CIOs / CTOs

This is the platform for driving your AI strategy. Transform scattered enterprise knowledge into a true competitive advantage and build a foundation for smarter operations.

For Data Science Teams

Accelerate innovation by taking a project from raw data preparation to custom AI deployment, all on one end-to-end platform.

For Business Units

Apply AI for domain-specific needs with custom LLMs that speak your enterprise's language, enabling faster, more accurate decisions.

Activate your enterprise knowledge today.

With HorizonAX Activate, your enterprise can turn scattered knowledge into actionable AI intelligence. From data readiness to custom AI deployment, HorizonAX Activate ensures AI becomes your growth engine.
