

CS Agent 365- Governance & Protection

Utilize the new power of Agent 365 for an enterprise scale agent governance.

We help enterprises unlock the potential of AI agents with a standardized, scalable governance model built on Microsoft technologies such as Entra, Purview, Defender, Power Platform, Agent 365 and Microsoft 365.

Agent 365 by Campana & Schott provides a holistic approach to bringing AI agents safely and efficiently into enterprise operations. Our modular and success-proven methodology ensures that virtual employees are governed with the same rigor as human users — with full lifecycle management, security, identity, compliance, and operational guardrails.

Envisioning, Strategy Development & Roadmap

Ignite on the Agent 365 possibilities and develop the appropriate strategy including business case and roadmap for the utilization of agents and Agent 365 – considering individual requirements, use cases, economic efficiency, best practices, etc.

Outcome: Statement of Work and strategy on how to utilize Agent 365.

Agent 365 and agent Readiness & Implementation

Elaborate on organizational and technical requirements to best utilize the Agent 365 and agent functionalities. After ensuring the readiness the implementation of Agent 365 can be conducted.

Outcome: Ready organization and technology to utilize agents.

Adoption & Change Management measures for successful rollout:

The successful anchoring of Agent 365 and agents in the company is achieved by high expertise in Adoption and Change Management, our profound technological know-how as well as the extensive experience from past projects.

Outcome: Get the maximum of your investment in Microsoft.

Identity, Compliance & Security architecture and consulting:

We consult holistically - including Copilot and AI technologies - ensuring secure, compliant, and policy-aligned management across identity, data protection, threat defense, and operational controls with all technologies.

Outcome: Secure and safe environment for best utilization of AI.
