

# AI Design Workshop: Unleash the potential of your data with the power of Azure AI.

**About the CS AI Design Workshop:** The CS AI Design 1-day workshop is designed to help organizations discover the potential for improvement in their business case by leveraging the Azure data platform and Azure AI. The goal of the workshop is to identify the data maturity of already implemented analytics solutions and brainstorm potential areas of improvement that can be solved using data analytics. Finally, the workshop aims to derive the next best AI & analytics use cases that can unleash the power of their data and improve your business model.

## 1 Day Workshop – Identification of impactful use cases that boost your business with Azure AI.

### Business Model Analysis

**Goal:**  
At first we build a common understanding of the underlying business model of your organization or your department. This foundation leads us to interactively discuss and derive areas of improvement.

**Deliverables:**

- Business Model Canvas
- Derivation of areas of improvement

### Analytics Maturity Assessment

**Goal:**  
Next, the workshop focuses on analyzing your organization’s AI and analytics maturity. This is an important step towards improving your data-driven decision-making capabilities. This involves identifying the current state of your organization’s AI and analytics solutions and categorizing them according to their maturity level.

**Deliverables:**

- Analytics maturity assessment
- AI & Analytics landscape incl. data sources

### AI / Analytics Roadmap

**Goal:**  
At the end of the workshop, participants will have a clear understanding of the potential benefits of data analytics for their organization, as well as a set of actionable next steps for implementing new analytics use cases with Azure AI. This includes developing a roadmap.

**Deliverables:**

- Prioritized list of impactful use cases
- Well-defined AI/Analytics use case(s) with Azure AI

Overall, the **CS AI Design Workshop** can be a highly effective way for organizations to unlock the full potential of their data and drive growth and innovation. By bringing together key stakeholders and experts in a collaborative and creative environment, the workshop can generate new insights, solutions, and opportunities for the organization to thrive in the digital age.
