

The use of data is a key driver of business value for any organization.

Intelligent Cloud

ABOUT CS Analytics Envisioning: 1-day workshop

The CS Analytics Envisioning workshop is designed to help with understanding the value of the Microsoft Analytics tool stack and then adopting it for your organization. In addition, we can outline holistic support for the transformation to a data-driven organization.

1 Day Workshop – COMPACT APPROACH – IMMEDIATE RESULTS

Envisioning & Use Cases

Goal:
From the very beginning, we support you on your way to a data-driven company. Understand data as a central component of your organization's digital transformation.

Deliverables:

- Identification of revenue streams and corresponding data use cases
- Mapping of use cases to data landscape

Development

Goal:
With intelligent solutions we jointly create efficient structures and processes. Enrich business and work processes and increase efficiency through automation and data.

Deliverables:

- Overview on options to modernize existing applications and optimize of business processes through a compliant data platform

Platform

Goal:
Review necessary steps to enable broad data usage and establish necessary skills and tools. List organizational and technical prerequisites for data-driven decisions.

Deliverables:

- Focus on IT and data platform strategy
- Reduction of IT infrastructure costs
- Improving ROI for data analytics

Rollout

Goal:
For a proper rollout of the platform, we outline scaling effects and highlight road blockers right from the beginning.

Deliverables:

- Roadmap to enable the cloud data platform considering topics like
- workers council, data protection, Evergreen system, etc.
