

Get Your Datacenter Moving: Datacenter to Azure Implementation

ABOUT CAMPANA & SCHOTT Datacenter to Azure Implementation:

Together with server and application owners, our team of Campana & Schott consultants migrates your on-premises workloads into a public or hybrid cloud scenario. Our success factor is an iterative and application-based migration approach.

WHAT WE OFFER

Prerequisite for any migration project is to first validate status quo and the expected business outcome of your cloud strategy.

We start with a quantitative analysis of your server landscape which is followed by a qualitative analysis of your business applications. Consolidating the output, we build the baseline for your cloud migration.

A detailed planning for each application in collaboration with the application owners yields the migration plan including priorities, quick wins and a chronological order.

Besides the steering of the migration project, we support you adapting your current operating model to the needs of operating a cloud platform.

WHAT OUR CUSTOMERS ARE SAYING

"Campana & Schott has significantly accelerated our adoption of the Azure platform. Today, CS's best practices and customizations contribute vastly to the smooth operation of our Azure platform."

– Linus Pfeiffer, Domain Owner Workplace Solutions, Metro

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

WHY AZURE

Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
