

CS Microsoft Endpoint Management

2-Wk. Assessment, Envisioning & Implementation.

Elevate your endpoint management to resilient, performant and efficient cloud-only approaches with Intune & Autopilot.

Engage Campana & Schott with professional, technical and methodological expertise to guide the utilization of the Microsoft Endpoint Management solutions Intune & Autopilot.

Envisioning, Strategy Development & Roadmap

Ignite on the endpoint management possibilities and develop the appropriate strategy including business case and roadmap for the utilization – considering individual requirements, use cases, economic efficiency, best practices, etc.

Outcome: Statement of Work and strategy on how to turn technology into an efficient usage for your company.

Assessment of the environmental baseline

Elaborate on organizational and technical requirements to best utilize the features. After ensuring the readiness the implementation of the Microsoft Endpoint Management solutions can be conducted.

Outcome: Ready organization and technology to utilize the full benefits.

Analysis of the current utilization of endpoint management

If needed, optional experimental setup and connection of devices to the solutions to get hands-on experiences.

Outcome: Hands-on experiences in managing endpoint in a modern way.

Analysis of results and specific recommendations

Based on the performed assessments and analyses Campana & Schott experts will compile specific recommendations how to act and migrate to modern endpoint management.

Outcome: Clear roadmap how to best utilize endpoint management in your environment.
