Workshop brief

CS
Campana
Schott

Integrated deployment of business applications. Teams as a platform.

Envisioning Workshop. Improve productivity and efficiency of your processes right within MS Teams.

GOAL

Develop ways to **improve productivity** by leveraging Microsoft **Teams as a platform** to build modern and comprehensive **business critical applications** right in MS Teams.

Approach

Experience

See applications and relevant processes in Teams of other companies

Select

Select scenarios for optimization by using MS Teams.

Strategy

Decide on a path to bring first applications into your company within MS Teams.

Objektives / Deliverables

- **Identify and prioritize** your key use cases.
- Demonstrate the **possibilities for streamlining your business processes** and **improving productivity**.
- Create an **introductory plan** and next steps to implement the **first use cases in Microsoft Teams**.
- Derive **app governance** in MS Teams for your company
- Accelerate results with **apps and accelerators** ready-to-use apps, plug-and-play templates, and custom solutions.

SETUP

Duration

Two workshop

Participants

max. 10,
IT and
departments

Format

Virtual /
Onsite

Teams as a platform envisioning. Workshop Outcomes.

Ensure to **improve workforce productivity** through **automation of key business processes** by leveraging Microsoft Teams platform.

Identify scenarios to drive business results

Define and review scenarios to increase productivity through process automation within Teams.

Speed outcome using Apps and Accelerators

Evaluate ready to use Apps, plug and play Accelerators and solutions options.

Enable App governance in Teams

Provide guidance on governing Apps using policies and controls.

Build an implementation plan

Develop a plan to implement the collected recommendations.

Agenda. Overview on the workshop.

First day

- **Welcome and kick-off**

Introduction | Alignment on workshop goals

- **Teams platform overview**

Teams as a platform for apps and solutions | Extension points in Teams

- **Ideation on a possible first app**

Examples – templates and other customer solutions | Joined brainstorming of relevant business processes within a whiteboard session | Selection of one scenario to implement

Second day

- **Solution design**

CS proposal for identified scenario | Technical requirements | project approach

- **Plan for app activation and enablement**

Overview on governance policies available to enable app activation

- **Next steps**
