# Azure FastStart Service

Accelerate your transformation with Microsoft Cloud

## Do you have a strategy to adopt Azure?

We can help you get started on your cloud journey efficiently, following standard best practices.

### Starting out with Microsoft Cloud

Embracing a Microsoft hybrid cloud solution can often be quite daunting and a challenge to many IT organizations. Through our wealth of experience we've created a service that quickly delivers a foundational Azure environment, configured to best practice and incorporating our lessons learned from hundreds of deployments.

### Approach

We've developed proprietary methods to help accelerate the deployment of the foundations for Azure. In addition, the service will be delivered by a highly skilled Azure consultant who will cross-train your team in the process.

### Key Benefits

IT becomes an enabler for cloud adoption and innovation

Removes the lead time and complexity of setting up Azure

Provides a hybrid identity solution to build upon

Ensures best practices for security and Azure principals are adopted

Helps address internal skills gaps with new cloud technology

### Deliverables

Azure Expert

Azure Best Practices Build

CSP contract (if required)

24x7x365 Critical Support

Azure Strategy Workshop

## What's included?

As part of this service, we'll setup and configure the following components:

### Subscriptions

Configuration of the Azure subscriptions and public namespaces

### Identity

Configuration of Azure Active Directory and federation services to setup hybrid identity ready for consumption via Microsoft cloud services including Azure and M365

### Security

Configure the Subscription and tenant security policies, including resource groups and base network security groups

### Storage

Configure base storage accounts ready for resources to be placed in storage containers

### Networking

Configure a site to site VPN for secure hybrid cloud operations

### Processes

Define role based access and administration models for the Azure tenant plus follow up the delivery work with an onsite strategy workshop
