COMPANION

BY CANTOR

ACCELERATE
END-TO-END
DEPLOYMENT OF
STEP IN YOUR
ORGANISATION

Based on Stibo Systems STEP technology, the Companion software suite:

- Strengthen the communication between your business and IT teams

- Optimise the quality of your developments

- Accelerate the integration of STEP data into your IS

www.cantor.fr

FACILITATE

Make your data accessible and understandable to non-experts STEP

Simplify the modeling of data from STEP to make it accessible to all your users, according to their needs

OPTIMISE

Process a large volume of data to expose and export it quickly

Improve your IS performances by processing multiple, high-volume and personalized exports at once

ACCELERATE

Expose your data to the whole organization using a user-friendly tool

Accelerate the exposure of data from STEP regardless of your IS environment (middleware, BDD)

(c4i)

Transform STEP rich data model into denormalized and "easy to read" data

Accelerate, industrialize and secure the way you need to expose data from STEP to your IS, with high performance

Deliver data (full or delta) to multiple targets : MongoDB, SQL, Apache ActiveMQ...
