Power Platform Solution
SELF SERVICE EMPLOYEE PORTAL

PLUG & PLAY PROCESS AUTOMATION USING MICROSOFT POWER PLATFORM

ENABLE employees to access and complete routine employment tasks, ensuring they spend more time producing.
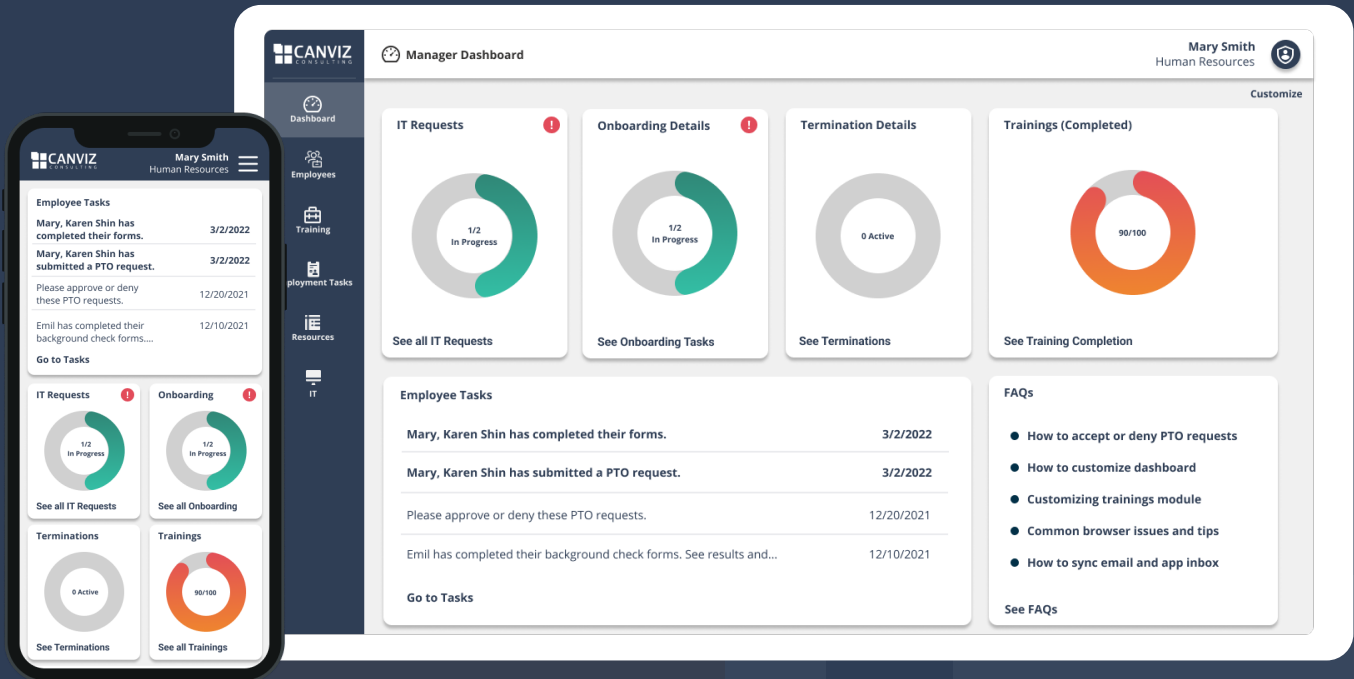

REDUCE the amount of manual effort that requires printed paper, scanning, and tracking progress.

CAPITALIZE on the Microsoft 365 investment your organization has already made, leading to consistent employee experiences and fewer platforms to sustain.

HOW IT WORKS

Canviz will drive a proof-of-concept demonstrating a cost-effective Power Platform solution for your needs.

Utilizing the Microsoft 365 licenses you already own, the Canviz professional services team, led by experts in Microsoft's Power Platform, will guide you through a Proof of Concept (POC) phase to determine if the platform meets your organization's needs for HR process automation.

1 We start with discussions about your processes and goals. To define scope of the POC, we'll review current processes, data sources, functionality, automation, and custom integrations.

2 Canviz will then create a Power Platform POC demonstrating the power of the tools to meet organizational goals.

3 The final step is a demo of the POC, an estimate to complete the solution and how to scale it to meet other organizational needs.

4 The output provides detailed requirements to provide your stakeholders to obtain approval to move forward with Power Platform solutions.

CALL US TODAY TO GET STARTED!

CANVIZ specializes in creating software solutions based on Microsoft's Azure and Microsoft 365, and Office 365 platforms, as well as open-source technology.

Our team includes industry-recognized experts and a global workforce. We pride ourselves on delivering cutting-edge, cost-effective solutions that improve a company's productivity and bottom-line profit.
