iMIGRATE – CAPGEMINI'S SOLUTION FOR INTEGRATION PLATFORM MIGRATION

Leveraging automation and AI technologies to enable a seamless transition from legacy systems to modern platforms

Capgemini

iMIGRATE REDEFINING INTEGRATION PLATFORM MODERNISATION

AI and Automation at the Core of Seamless, Scalable Migration

Migrating large-scale integration platforms is often a complex, resource-intensive endeavour—typically involving thousands of APIs, skill gaps, and deeply customized legacy systems. Justifying the investment can be difficult, as traditional approaches are slow, costly, and offer limited visibility into tangible outcomes.

Capgemini's iMigrate transforms this challenge into an opportunity. Powered by **AI and intelligent automation**, iMigrate streamlines and accelerates the migration of legacy integration platforms to modern iPaaS Platforms.

WHY iMIGRATE ?

Accelerated Migration: Automates up to 70% of migration tasks that includes data mapping and transformation logic.

Cost-Efficient: Minimises code migration costs through intelligent automation and reusable assets.

Future-Ready: Enables seamless transition to scalable and composable architectures that will support your digital transformation and modernisation programs

iMIGRATE– SMART AUTOMATION AT THE CORE

iMigrate uses intelligent **source parsers** and **target adapters** to automatically extract metadata, configurations, and integration logic from legacy environments. This enables rapid and accurate migration of Integration flows, Data structures and Business rules.

AI-Powered Precision

By integrating **Generative AI** and **Large Language Models (LLMs)**, iMigrate dramatically improves the accuracy of data transformation and mapping. This reduces manual effort, minimises errors, and accelerates delivery timelines.

Broad Compatibility for Seamless Migration

iMigrate platform supports source-to-target migration scenarios—enabling smooth transitions from systems such as **BizTalk, MuleSoft, Tibco , Boomi** to modern integration environments like **Microsoft Azure**. This flexibility ensures organisations can modernise at scale, regardless of complexity in their existing technology landscape.
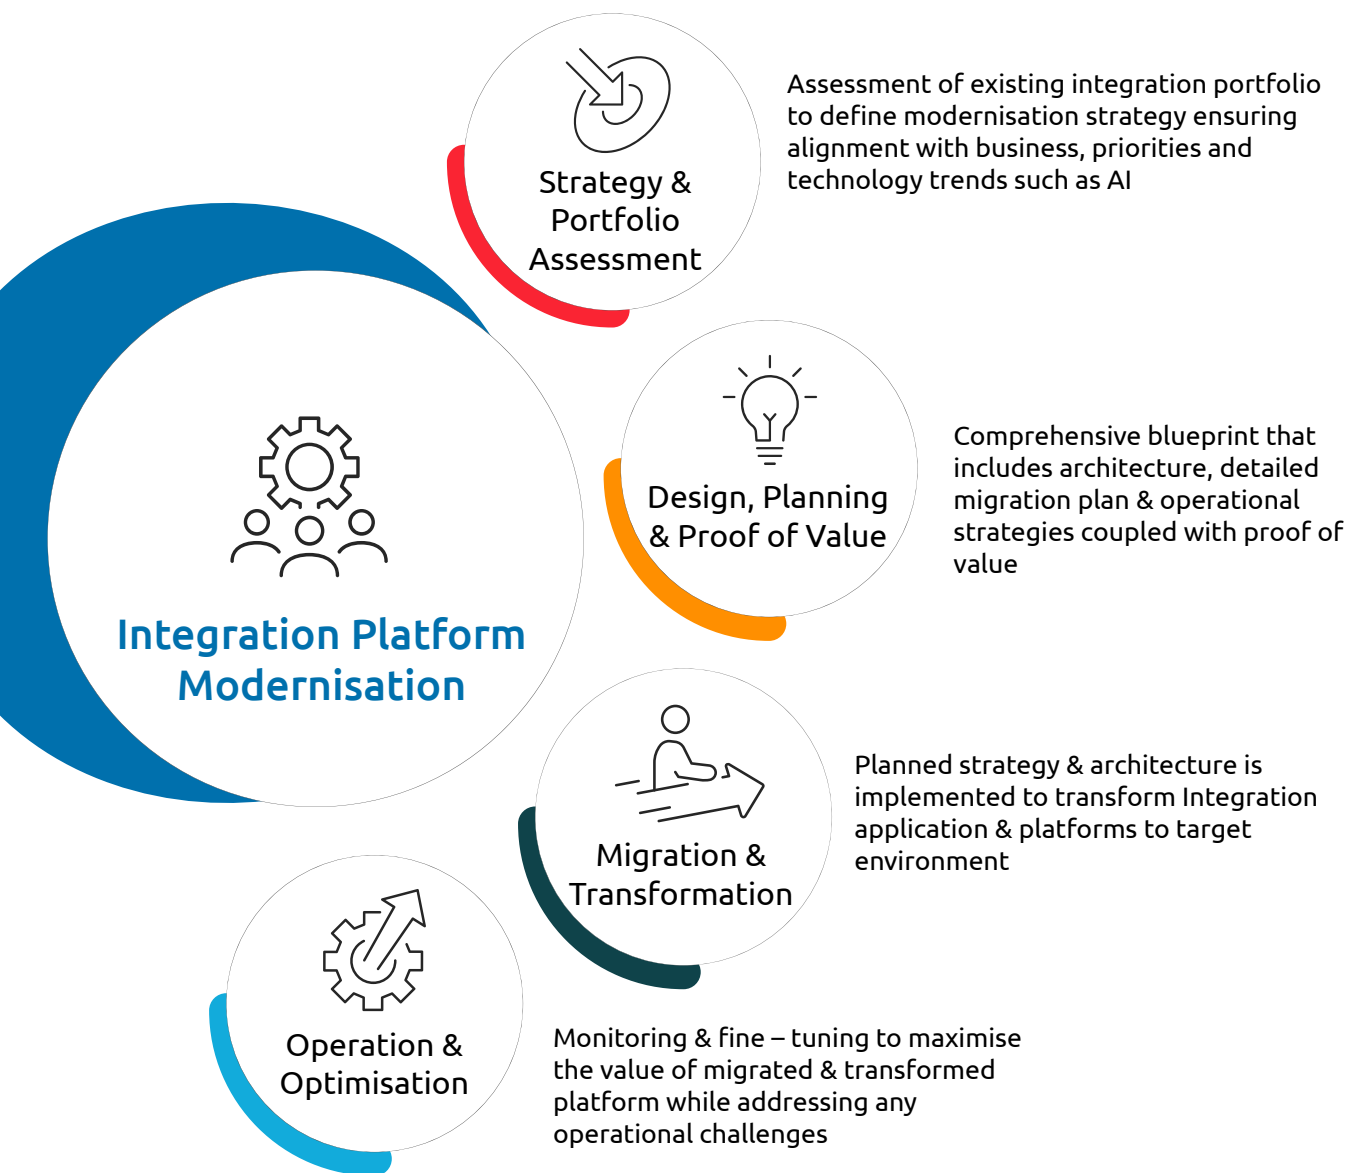

WHAT WE OFFER

## Comprehensive Integration Platform Modernisation powered by iMigrate

Capgemini delivers a holistic, value-driven approach to integration platform modernisation—designed to unlock agility, scalability, and long-term business value. At the heart of our solution is **iMigrate**, our AI and automation-powered accelerator that simplifies and speeds up the transition from legacy systems to modern integration platforms. We guide organisations through **four strategic phases**, each meticulously crafted to maximise transformation impact, future-proof your integration landscape, and address operational challenges head-on.

Integration Platform Modernisation

Strategy & Portfolio Assessment

Assessment of existing integration portfolio to define modernisation strategy ensuring alignment with business, priorities and technology trends such as AI

Design, Planning & Proof of Value

Comprehensive blueprint that includes architecture, detailed migration plan & operational strategies coupled with proof of value

Migration & Transformation

Planned strategy & architecture is implemented to transform Integration application & platforms to target environment

Operation & Optimisation

Monitoring & fine – tuning to maximise the value of migrated & transformed platform while addressing any operational challenges

---

By combining deep domain expertise, proven delivery methodologies, and the power of **iMigrate**, Capgemini transforms legacy integration environments into **modern, resilient platforms**—ready to support your digital future.

SUCCESS STORY

**Real solutions for the real world.**

Integration platform modernisation for global French luxury fashion retailer

A centralized organisation with legacy integration platform solutions struggled to integrate diverse IT environments quickly and enable the self-service approach required for new Group IT digital transformations and local country operations. Capgemini partnered with them in a CoE co-delivery model to modernise the integration platform, providing comprehensive end-to-end support that included:

- Integration Solution Factory & Industry Standards Adoption: Implemented CoE measures and re-architected the system to enhance reliability and performance.

- Program Management: Developed a detailed migration roadmap, operational strategy, and execution framework to ensure a smooth country-wise rollout.

- Technical Upgrades and Platform Migration: Upgraded and migrated from legacy Platform to Azure IPaaS Services using iMigrate.

WHY CAPGEMINI

At Capgemini, we are passionate about delivering a solution that takes you where you want to go next. About solutions that get results… The right results. That's why we are constantly working to make sure you benefit from the best capabilities

- **Unparalleled Scalability:** We have over 22,000 software consultants across the globe. We are proud of our strong Business APIs and Application Integration capabilities and certified product experts.

- **Global Delivery Capabilities:** We have strategically placed teams including local presence in Europe, North America, and Asia-Pacific with nearshore and offshore delivery centres meaning we can work to whatever model you need.

- **Successful Partnerships:** We collaborate with key software partners, including Mulesoft, Tibco, Boomi, IBM, Workato, Google, AWS, and Microsoft, ensuring best-in-class solutions and global strategic alliances.

- **Measurable Progress:** Our expert software engineers monitor your transformation every stage, providing regular proof of outcomes to ensure our results align precisely with your business requirements.

About Capgemini

Capgemini is an AI-powered global business and technology transformation partner, delivering tangible business value. We imagine the future of organizations and make it real with AI, technology and people. With our strong heritage of nearly 60 years, we are a responsible and diverse group of 420,000 team members in more than 50 countries. We deliver end-to-end services and solutions with our deep industry expertise and strong partner ecosystem, leveraging our capabilities across strategy, technology, design, engineering and business operations. The Group reported 2024 global revenues of €22.1 billion.
