

STREAMLINE ONBOARD

Microsoft Power Platform

DREAM **BIG**

START **SMALL**

DELIVER **FAST**

STREAMLINE ONBOARD

We have designed the Streamline Series for Power Apps to support you in getting maximum value from the Power Platform and quickly unlock potential in your organisation.

Streamline Envision, Onboard and Realise are targeted, time-boxed engagements, allowing you to quickly demonstrate a return on investment. Because of this, Streamline for Power Platform is aimed at quickly and effectively solving unique, discrete problems and not digitally transforming a business. .

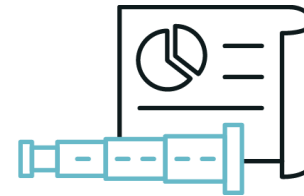

Streamline Onboard can be of help for organisation in any of the stages of an app development. This means we can engage with your team to help define the app and build it for you; add capacity to supplement your existing team; or provide review and coaching capabilities to guide your team while enabling knowledge transfer.

Streamline Onboard is a targeted, timeboxed engagement, so that you can quickly demonstrate a return of investment. Because of this, Onboard with Power Apps is aimed at solving a specific business problem and not necessarily digitally transforming your entire business.

2-week duration

\$25,000 (ex. GST) fixed cost

HAVE YOU GOT THESE CHALLENGES?

Time consuming manual processes

No suitable “off the shelf” apps

Can’t effectively operate while mobile

Lack of development budget to build a bespoke app

Power Apps

Build enterprise apps at scale to transform business processes and advance digital enablement.

Power Automate

Create seamless cross-platform workflows that automate time-consuming tasks, eliminate paperwork and drive productivity.

Power BI

Become a data-driven organisation by surfacing and sharing actionable insights with easy-to-use dashboards.

Power Virtual Agents

Build chatbots that facilitate seamless engagement at customer and employee touchpoints, and capture valuable data to drive continuous improvement.

OBJECTIVE

To deliver a fit for purpose small scale app, to solve a specific business problem, in a defined timebox ready to be realised, while also providing cost certainty for the scope, approach and timeline.

We'll help you visualise innovative solutions to improve your customer engagement, employee empowerment, operational optimisation, and product transformation.

OVERVIEW

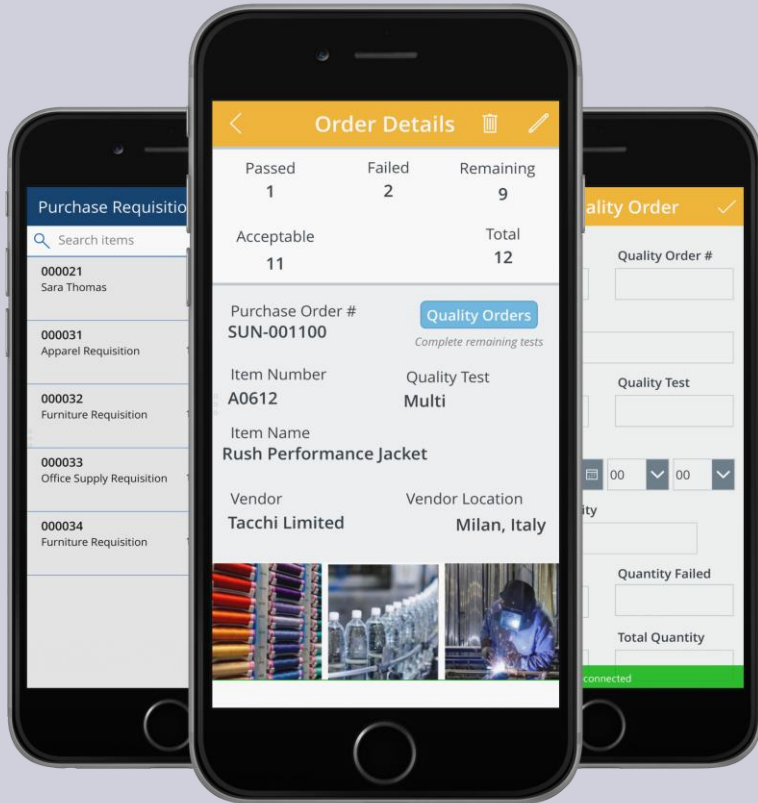

What's involved and how do we do it?

-  **A half day definition workshop** for our experts to work with your experts in, positioning the capability, working through the business problem and defining the application build at a high level.
-  **A full day internal session** for our design specialists to put on their technical hats and map out an app design, considering the technology, and task out all the different elements that need to be built.
-  **A week of our Power Apps team building out your app** on the Microsoft Power Platform.
-  **A 2-hour Playback session** give you an idea of how the app is shaping up, and to provide some feedback.
-  **An additional 3 days of building activities** and implementing any final touches.

-  **A second 2-hour Playback session** to demonstrate your final application build.
-  **A half day of training** to your key user/s so that you can educate the balance of your team.
-  Finally, some **support for you to rollout** your application to the intended business users.

MICROSOFT POWER APPS

DESIGN AND BUILD A BUSINESS APP WITHOUT WRITING CODE.

TARGET YOUR APP AT INTERNAL OR EXTERNAL STAKEHOLDERS

MODEL YOUR BUSINESS DATA, DEFINE YOUR BUSINESS PROCESSES

KEEP ALL YOUR DATA INSIDE THE HIGHLY SECURE MICROSOFT CLOUD ECOSYSTEM

ACCELERATE YOUR DEVELOPMENT TIME WITH PRE-BUILT CONNECTORS AND TEMPLATES

PROJECT CONSTRUCT

APPROACH

Consultant led

2 – week engagement

Model your business data and define your business problem/process

Design and build an App without writing code

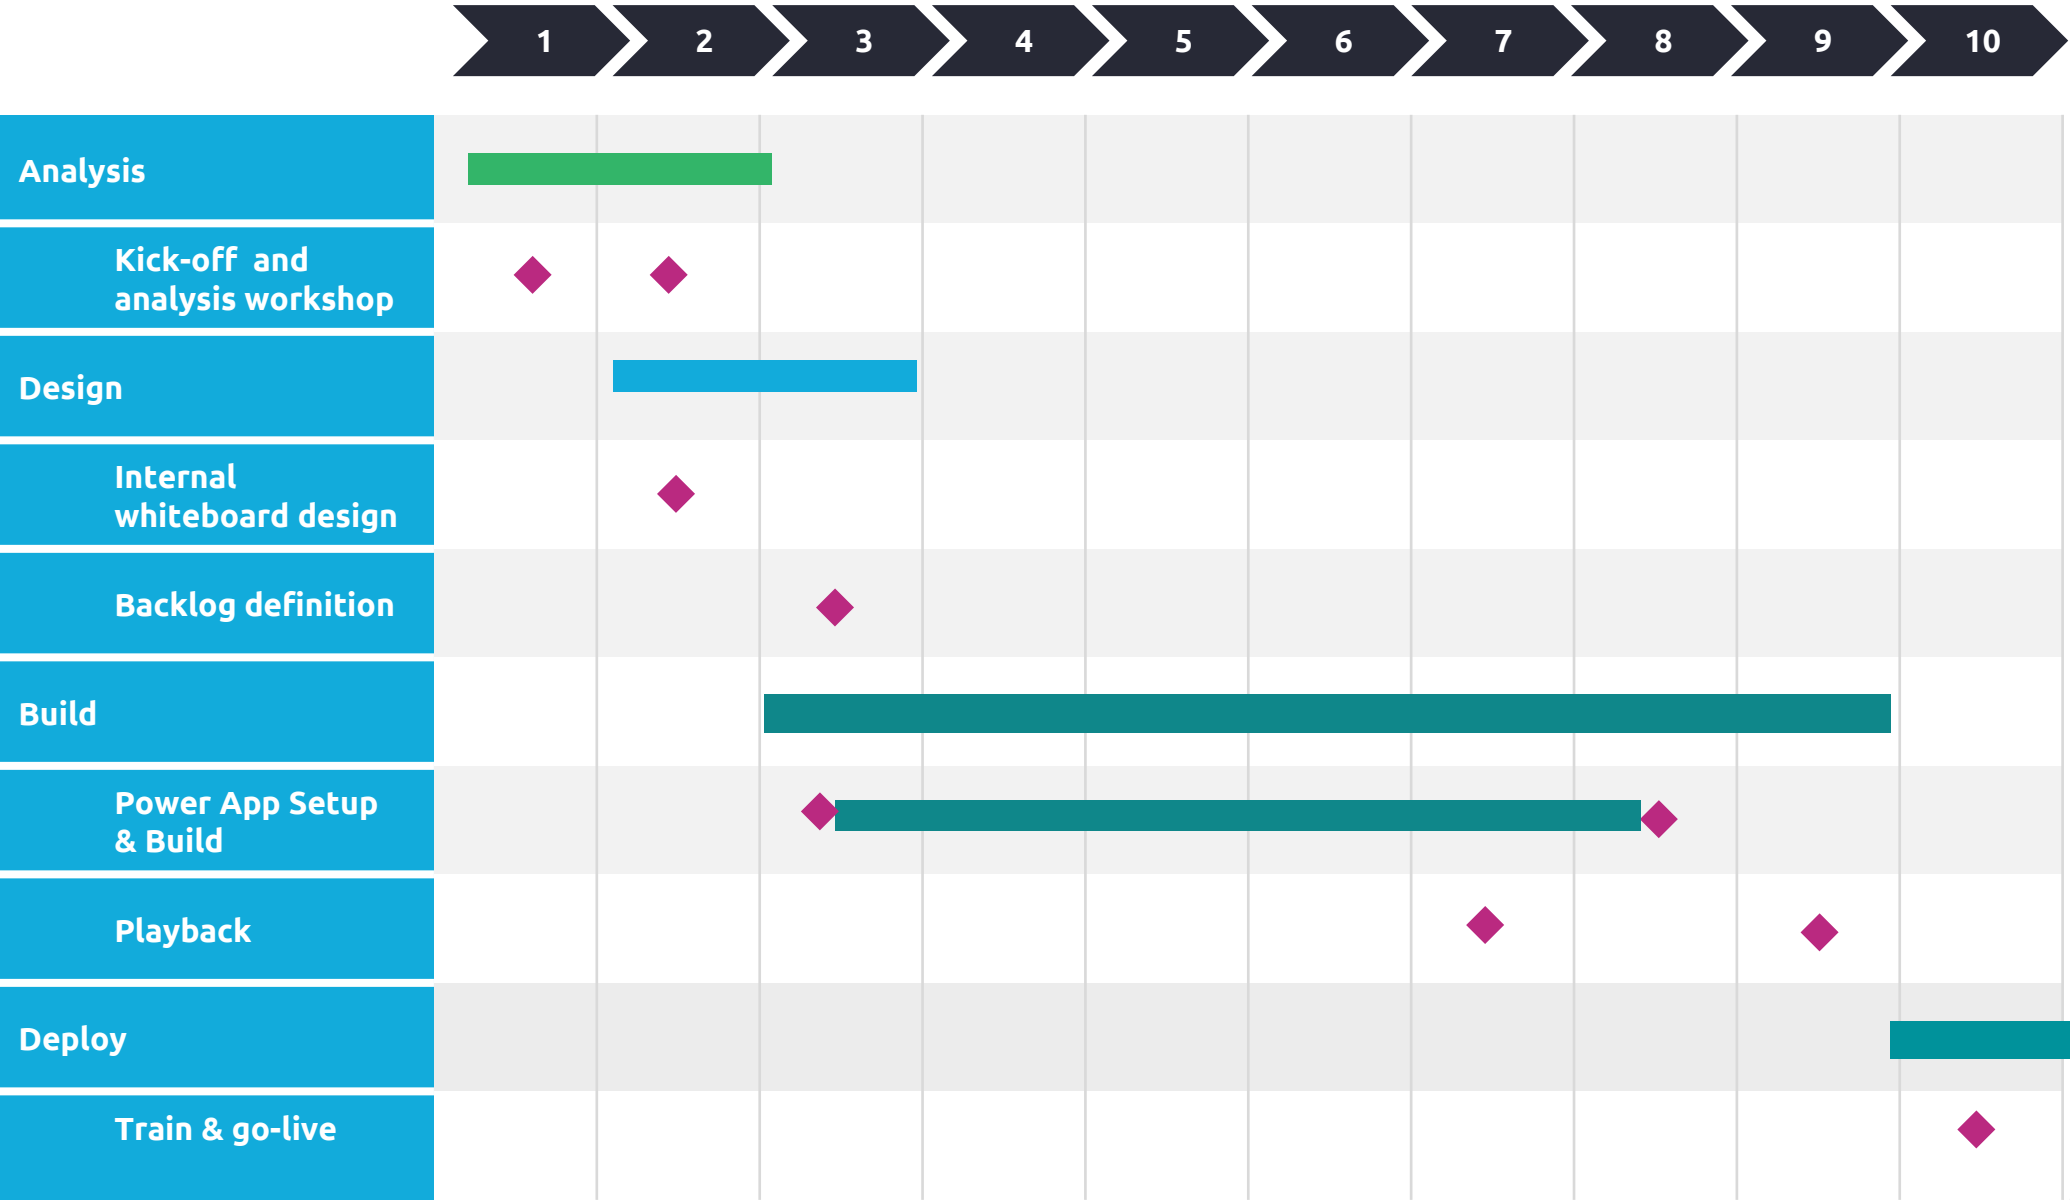

Review and refine

Get ready to deploy

PROJECT TIMELINE

SUMMARY

Outcomes

- Providing a defined scope and cost for the implementation of a Microsoft Power App.
- As scope is defined, minimal risk up front, but does allow for ongoing improvements using the wider Dynamics 365 and Microsoft 365 capability.
- Ideally suitable for less complex business requirements, or as an initial phase prior to implementing a more complex application build.
- Start small, dream big and learn fast, deliver and grow.
