

STREAMLINE REALISE

Microsoft Power Platform

DREAM **BIG**

START **SMALL**

DELIVER **FAST**

STREAMLINE REALISE

We have designed the Streamline Series for Power Apps to support you in getting maximum value from the Power Platform and quickly unlock potential in your organisation.

Streamline Envision, Onboard and Realise are targeted, time-boxed engagements, allowing you to quickly demonstrate a return on investment. Because of this, Streamline for Power Platform is aimed at quickly and effectively solving unique, discrete problems and not digitally transforming a business. .

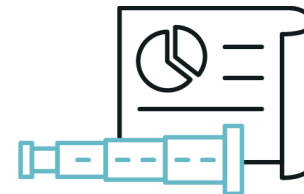

Streamline Realise assumes your team already has a base understanding of the components that make up the Power Platform. It aims to give your team some specific knowledge, guidance and supporting assets through a series of facilitated workshops to gain understanding on how to govern the power platform, back it by ALM and Devops and setup the tools necessary for these activities including Microsoft's Centre of Excellence Starter Kit.

Streamline Realise is a targeted, timeboxed engagement, that allows you to be introduced to the best practice principles of Power Platform governance.

2-week duration

\$12,000 (ex. GST) fixed cost

HAVE YOU GOT THESE CHALLENGES?

Losing track of what power platform assets are deployed across the business

No consistent use of power platform capability

Unsure of user adoption for various apps and automations

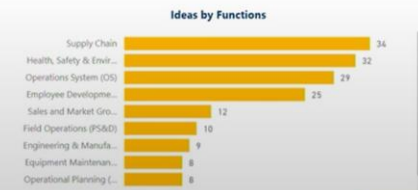

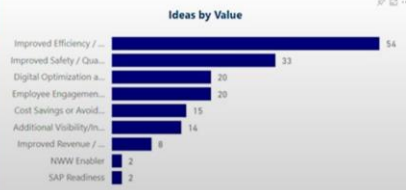

Lack of monitoring and management, application lifecycle management, devops and deployment practices

OBJECTIVE

To build your knowledge, with practical learning and enablement of best practice good governance in your Power Platform environment.

OVERVIEW

What's involved and how do we do it?

Understanding governance and best practices 2 sessions to cover the following topics (Components, Architecture, Environments, Dataverse, Platform Limits, connectors, on-premises data gateway and licensing, security, DLP, Sharing, Management and Monitoring, Deployment, Solutions, Versioning , ALM and DevOps).

Setting up some core governance capability a number of shorter sessions that take your people through the setup of the Microsoft Centre of Excellence Starter Kit with recommendations around what apps should be implemented for governance.

.

PROJECT CONSTRUCT

APPROACH

Consultant led

2 – week engagement

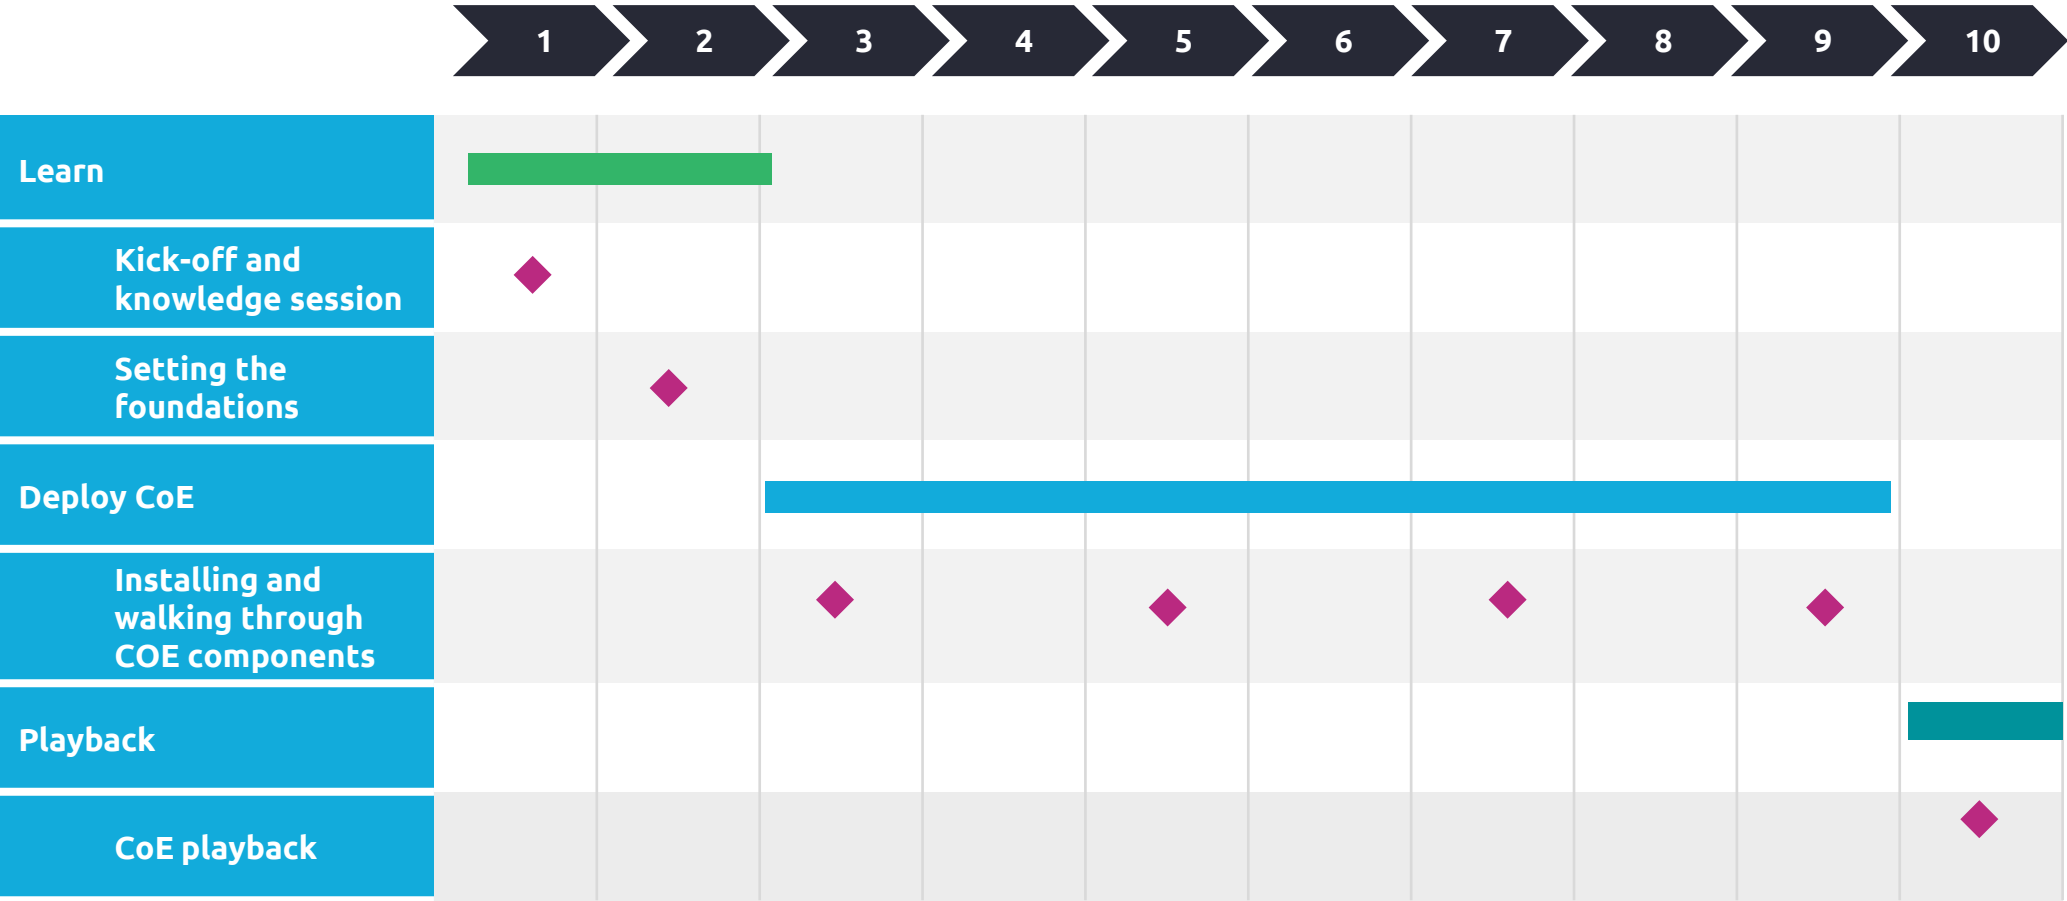

Understand governance best practices

Setup some core capability with the Microsoft Centre of Excellence (CoE) Starter Kit

PROJECT TIMELINE

SUMMARY

Outcomes

- Providing a defined scope and cost for the implementation of the Microsoft CoE Starter Kit.
- Transfer knowledge from our technology experts to your business experts
- Highlight how best to manage and monitor the Power Platform and the wider Dynamics 365 capability.
- Learn practically with the right tools in a collaborative manner.
- Ideally suitable for teams responsible for managing business applications and their development on the Power Platform
- Start small, dream big and learn fast, deliver and grow.
