

# REDEFINE THE DATA JOURNEY USING MICROSOFT FABRIC

# CHIEF DATA OFFICER - KEY DATA RELATED CHALLENGES

# MICROSOFT FABRIC – A GAME CHANGER TOWARDS DATA JOURNEY

ACCELERATE YOUR DATA  
POTENTIAL WITH  
MICROSOFT FABRIC

- Microsoft Fabric is an end-to-end, unified analytics platform that consolidates all the necessary data and analytics tools required by organizations.
- Fabric simplifies analytics projects by offering a unified product with all the necessary capabilities for extracting insights from data and present it to end-users.
- As a software-as-a-service (SaaS) solution, it seamlessly integrates and optimizes all components, allowing for quick sign-up and delivering tangible business value within minutes.
- Fabric empowers every team involved in analytics, ensuring a seamless experience for data engineers, data warehousing professionals, data scientists, data analysts, and business users.

Capgemini has partnered with Microsoft to bring our clients our powerful Industrialized Data & AI Engineering Acceleration (IDEA) solution. IDEA by Capgemini combines best-in-class data engineering, analytics, and AI capabilities with Microsoft Fabric - a complete solution that combines a variety of tools and services into a single analytics platform.

# FABRIC - DEFINING YOUR BASELINE AND ROADMAP FORWARD

## USE CASE ASSESSMENT

### Discovery Workshop

- Analyze the Existing Landscape to build a solid baseline and Roadmap.

### Fabric Awareness

- Present an overview of Microsoft Fabric
- Highlighting its key capabilities, updates, similarities, changes.
- Major benefits & ROI

### Maturity Assessment

- Our expert team can **analyze your processes, people, technology and data** to get a good as-is baseline.
- This supports the definition of improvement roadmap, identify use cases and build a roll-out plan.

1 Day Assessment

## DUE-DILIGENCE

### Definition

- Assess the current state by analyzing the current AI and Data Estate capabilities and initiatives.
- Identify the Data Estate requirements for Fabric.
- Clearly define the requirements and identify a sample use case.

### Due-Diligence

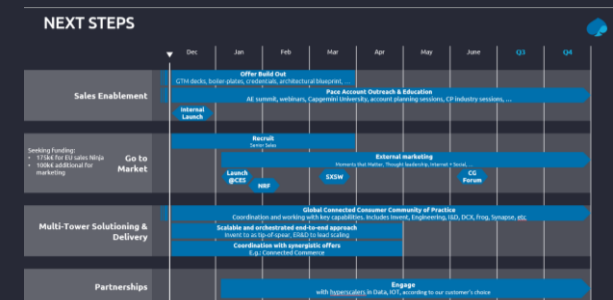

- Extract the necessary data from your current Data estate and/or external data sources.
- Utilize an AI-powered approach, facilitated by Gen AI, and incorporate Power BI if relevant to the specific path or use case.
- Conduct all activities and services using a "side-car mode," ensuring minimal disruption to your existing business operations.
- Develop and deliver train-the-trainer sessions for your designated Microsoft Fabric champions.

1 Month Workshop

## ROLL-OUT /IMPLEMENTATION PLAN

### Roll-Out

- Roll out the infrastructure for the one-stop shop and implement identified Fabric use cases.
- Based on this experience, we propose to become your trusted partner in facilitating the transition of your existing data estate to Microsoft Fabric.
- Update your data strategy plan by incorporating the new benefits offered by Microsoft Fabric into your roadmap and leveraging the insights gained from the Launch phase.
- Migrate your current data estate to Microsoft Fabric.

2-6 Months Roll-out

# CAPGEMINI – MICROSOFT FABRIC CAPABILITY
