

# Insurance Underwriting Workbench

Well informed decisions at pace

# Underwriting is the center of the risk transfer mechanism for insurance

- Underwriting is the key to viable insurance businesses: it is the key process determining profitability and scale.
  - *The process of 1) evaluating a risk to determine if the insurance company will insure it and, if yes, 2) pricing it (Brittanica)*
  - *To set one's name to (an insurance policy) for the purpose of thereby becoming answerable for a designated loss or damage on consideration of receiving a premium (Webster)*
- Broadly, underwriting includes risk transfer and risk accumulation:
  - Risk eligibility determination
  - Pricing of risks
  - Distribution engagement and relationships (with brokers, etc.)
  - Book management
- Successful underwriting as a process requires both speed and accuracy:
  - Accuracy: the quality of the risk assessment, pricing and profitability
  - Speed: the ability to underwrite efficiently, quickly, at scale

The underwriting process is about making risk transfer decisions. Effective (accurate) and efficient (fast) underwriting requires UW-focused systems.

- We designed and built workbenches for various product lines and markets, including the London market. The goals ranged from easier access to quality data, to making Underwriting a unified enterprise capability including new skill models.
- It's critical to look beyond the cost efficiencies as the goal and invest in features leading to improved business results overall.
- This intelligence and best practice accelerates the execution and improves the RoI.

# Capgemini's Underwriting Workbench is architected for long-term value

We architect to align with your technology roadmap, promote reuse, and integrate Capgemini proprietary accelerators.

## OUR WORKBENCH SOLUTION:

Our solution is aimed to address the current 'lag' that the Underwriters are facing across geography, LoBs and platforms to meet the market demand. An innovative solution that combines *SIMPLIFIED JOURNEYS* and value of *INSIGHTS* backed by *ENRICHED RISK DATA* coming from various internal & external sources.

## KEY CAPABILITIES:

- full scope of the Underwriter role from a single, coherent user experience.
- risk evaluation, to authorities-controlled pricing, manuscripting, and acceptance actions, to external report ordering and inspection ordering.
- embeds AI and automation, mitigate mundane actions, maximising time on core and sales
- delivers insights intuitively at the right point
- easier book management supported by ML insights
- agile market response (eligibility, appetite, guidelines etc)

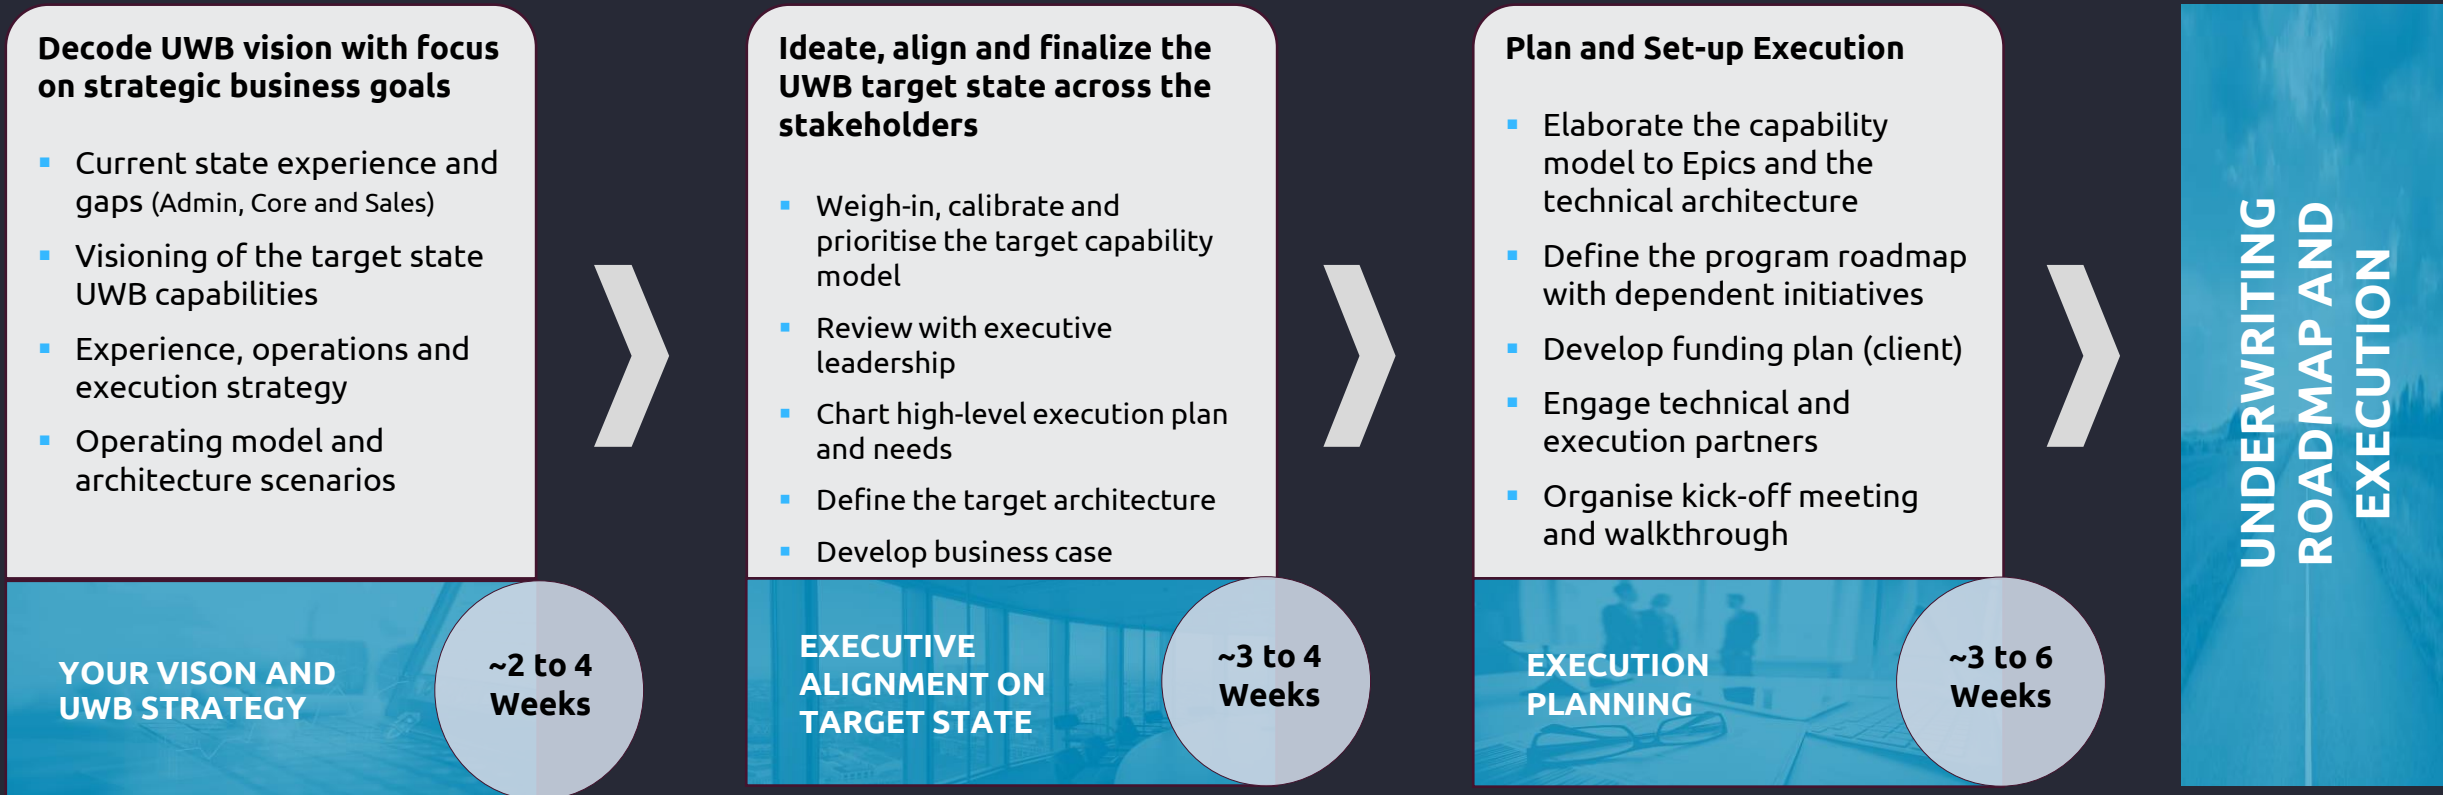

## TAILORED TO YOUR CONTEXT:

We will architect to align with your Technology roadmap and future-proofing principles, promote reuse and bring in Capgemini's proprietary accelerators. Will follow your cloud strategy with extensibility and interoperability as key drivers.

# Our goal-driven approach to collaboratively envision, design and implement the Workbench

We understand the complex business structure and federated ownership at Insurers and have a proven track record of successfully leading complex initiatives. While there may be multiple streams of work with different owners, Capgemini will ensure a cohesive, goal-driven program view..
