MIGRATION

ARE YOU READY FOR MIGRATING TO WINDOWS 11?

Automate and improve your end user migration cost effectively with Capgemini's Digital Platform Conductor (DPC) approach.

Windows 10 End of Support is Oct 14 2025, but 80% of business are still running it. Are you ready to migrate to Windows 11, but struggling to understand whether IT hardware or software assets across your organization are compatible? Why wait to migrate to the OS for hybrid work when the benefits are substantial, and the journey can be simple?

Capgemini provides a low-cost fixed price Windows 11 Assessment that will help you shave months off your Windows 11 project timeline, gain full insights into your endpoint hardware and software estate readiness, and make confident, data-driven decisions. In just a few days, see how the Capgemini solution

integrates seamlessly with your existing architecture to automate 89% of manual upgrade analysis and planning tasks, reducing time, costs, and the risk of human error.

Research shows that about 20% of devices are not compliant with Windows 11. Our consultants, certified in the industry leading workspace technologies, will help you evaluate options and devise the optimum plan to enhance the employee experience, drive productivity, and implement sustainable cost-effective solutions.

THE WAY FORWARD:

In 2 weeks receive a detailed report with recommendations that allows you to appropriately plan for longer range activities like RFP preparation, application and hardware readiness, organizational change management, and other competing business priorities, relieving the stress of last minute planning.

Participate in a demonstration of Capgemini's Automated Migration solution to understand:

- ▶ How employees can use our self-service portal to validate important end user data, self-select migration dates and choose from a pre-approved list of devices.
- ▶ How our enterprise level dynamic dashboards empower decision making with a single view across the migration, allowing for real-time impact analysis.
- ▶ How persona driven journeys improve a tailored employee experience
- ▶ How driving adoption ensures uptake of productivity features
- ▶ How Modern Device Management can move you to zero touch provisioning
- ▶ Best practices for peripheral testing

During the automated assessment get complete insight to streamline and derisk your migration through:

- ▶ A full end point inventory across the entire estate as captured in MECM/Intune
- ▶ Completion of a compatibility smoke-test of up to 100 client selected application packages against Windows 11

- ▶ A compatibility evaluation against your corporation's agreed minimum hardware requirements

Receive a documented migration recommendation of the waves based on available in-scope data such as staff availability, personas, application coverage, hardware compatibility, departments, and locations. Utilizing our best in class HW and SW partners, Capgemini will propose strategies for:

- ▶ Improving end point security
- ▶ Driving sustainable end point strategies to extend life cycle of assets
- ▶ Assessing various alternatives and cost models for end point workspace environment solutions including cloud modern endpoint management, virtual workspaces, and follow-me data strategies

Explore how Capgemini can reduce typical project costs by 40% with automated application testing. See how you can increase your process optimization by 86% thru automated workflows, communications, scheduling, capacity management and self-service portals to ensure a smooth and efficient transition for all devices.

PRE-REQUISITES:

Provide MECM/Intune and Active Directory exports (via a supplied PowerShell script) and application packages to be loaded to a secure Azure managed cloud location included as part of the service.

Note: On Premise requirements will be provided upon request

“Partnering with Juriba, Capgemini helps clients re-invent the People Experience and drive cost effective measurable business outcomes by empowering end-users to self-control their migration, and concurrently enabling enterprise business visibility on migrations and industry best practices.”

Tyrone Reece
Vice President, Cloud Infrastructure

About Capgemini
