

AI Document Reviewer Jump Start

The Challenge

Enterprises are drowning in a sea of documents. Manual document review is a time-consuming, error-prone, and expensive process that slows down critical business operations and exposes organizations to risk.

90%

Of all enterprise data is unstructured, a large portion being in the form of documents

50%

Of an employee's time is spent searching for information, with a significant portion reviewing documents

\$20

The average cost to manually review a single document, which fails to influence business decisions

Organizations that rely on manual document review are at a significant disadvantage, as they are slower, less accurate, and more expensive than their competitors who have automated this process.

The Solution

Sogeti's AI Document Reviewer Jump Start, powered by our AI Innovation Pod, helps you automate the process of document review, enabling you to extract key information, identify risks, and make better decisions, faster.

Automated Data Extraction

- **Entity Recognition:** Our solution automatically identifies and extracts key entities from your documents, such as names, dates, and amounts.
- **Clause Detection:** We can identify and extract specific clauses and provisions from your legal documents, such as contracts and agreements.

Risk and Compliance Analysis

- **Risk Identification:** Our solution can identify potential risks and compliance issues in your documents, such as missing clauses or non-standard language.
- **Policy Enforcement:** We can help you enforce your organization's policies by automatically flagging documents that do not comply with your standards.

Accelerated Innovation

- **2-day Jump Start** workshop with hands-on document analysis
- **Pre-built review models and templates** for common enterprise document types

Key benefits

- **Increased Efficiency:** Automate the process of document review and reduce the time it takes to review a document from hours to minutes.
- **Improved Accuracy:** Reduce errors and improve the accuracy of your document review process.
- **Reduced Costs:** Identify and mitigate risks in your documents before they become major problems.

Case Study

sogeti

US Law Firm - Contract Review Automation

CHALLENGE

A law firm was struggling to manually review thousands of contracts each year. The process was slow, expensive, and prone to errors.

SOLUTION

Through our Jump Start design thinking workshop, Sogeti implemented an AI document reviewer that automated the process of contract review.

RESULTS

The firm was able to reduce the time it takes to review a contract by **90%**, save millions of dollars in review costs, and significantly reduce the risk of errors.
