

Building Agentic Workflows Jump Start

Jump Start your Agentic AI Journey

Sogeti's Agentic AI Jump Start leverages our AI Innovation Pod to create agents that can reason, plan, and execute complex tasks. Our design thinking workshop rapidly identifies your organization's automation challenges and designs a strategic roadmap for implementing agentic solutions that transform how your teams approach complex processes.

8-12

Weeks from concept to deployment for traditional automation development

75%

Of orgs report that current automation tools lack the flexibility to adapt to changing business needs

60%

of complex business processes are still handled manually due to technology limitations

Benefits

Accelerated Automation:

Reduce the time to automate complex workflows from months to weeks.

Increased Resilience:

Build autonomous workflows that can adapt to change and recover from errors without human intervention.

Scalable Innovation Platform:

Build on Azure's enterprise-grade foundation with built-in security, compliance, and global scale to support growing innovation and AI initiatives

Building Agentic Workflows Jump Start

Deliverables and Activities may include:

- 1. Assessment & Recommendations**
 - **Current State Analysis:** A comprehensive audit of your existing workflows and automation capabilities.
 - **System Review:** Evaluation of your current technology stack to determine the best approach for implementing agentic workflows.
 - **User Experience Assessment:** Analysis of how your teams interact with current systems to identify the best opportunities for automation.
- 2. AI Readiness Accelerator**
 - **AI Agent Configuration:** Deployment and setup of a multi-agent system in your environment.
 - **Functional Prototype Code:** A working prototype of an agentic workflow that demonstrates the value of this approach for your business.
- 3. Design Thinking and Roadmap**
 - **Strategic Implementation Roadmap:** A phased approach with a timeline, priorities, and success metrics for scaling your agentic workflows.
 - **Governance Framework:** Security, compliance, and management protocols for your new automated processes.

Use Case

Challenge

A global logistics company was struggling to manually process thousands of international shipments daily, leading to delays and errors.

Solution

Through our Jump Start design thinking workshop, Sogeti worked with the team to build a prototype of an agentic workflow to automate the entire shipment process, from document verification to customs clearance.

Results

The company predicts to achieve a 90% reduction in manual processing time, a 75% decrease in errors, and a 50% improvement in overall shipment processing speed.
