

Intelligent Document Processing Jump Start

The Challenge

Enterprises are overwhelmed by the sheer volume and variety of documents they have to process every day. Manual data entry is slow, inefficient, and costly, and it often leads to errors that can have a significant impact on the business.

80%

Of business processes are document-dependent and require strategic development

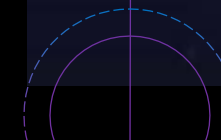

60%

Of an employee's time is spent on manual, repetitive tasks, such as data entry, which limits self-service adoption

4.5M

The average annual cost of manual data entry for a mid-sized enterprise, which fails to influence decisions

Organizations that rely on manual document processing are at a significant disadvantage, as they are slower, less efficient, and more costly than their competitors who have automated this process.

The Solution

Sogeti's Intelligent Document Processing Jump Start, powered by our AI Innovation Pod, helps you automate the process of document processing, enabling you to extract data, streamline workflows, and improve efficiency.

Automated Data Capture

- **Optical Character Recognition (OCR):** Our solution can extract text from any document, including scanned images and PDFs.
- **Handwriting Recognition:** We can even extract data from handwritten documents with a high degree of accuracy.

Intelligent Data Extraction

- **Field-Level Extraction:** Our solution can identify and extract specific fields from your documents, such as invoice numbers, dates, and amounts.
- **Table Extraction:** We can even extract data from complex tables with multiple rows and columns.

Accelerated Innovation

- **2-day Jump Start** workshop with hands-on document processing
- **Pre-built processing models** for common enterprise document types

Key benefits

- **Increased Efficiency:** Automate the process of document processing and reduce the time it takes to process a document from hours to minutes.
- **Improved Accuracy:** Reduce errors and improve the accuracy of your data entry process.
- **Reduced Costs:** Reduce the costs associated with manual data entry and document processing.

Case Study

sogeti

Insurance Company - Claims Processing Automation

CHALLENGE

An insurance company was struggling to manually process thousands of claims each day. The process was slow, inefficient, and costly

SOLUTION

Through our Jump Start design thinking workshop, Sogeti implemented an intelligent document processing solution that automated the process of claims processing.

RESULTS

The company was able to reduce the time it takes to process a claim by **80%**, save millions of dollars in processing costs, and significantly improve customer satisfaction.
