Cloud Solution Provider (CSP)

From better data security, to better adaptability, agility, and improved business performance, organizations across the globe are embarking on their cloud journey. Running workloads and applications in the cloud has become an essential component for many businesses.

Modernizing and migrating applications to the cloud requires careful assessment, planning, and project management. Organizations need to partner with experts who understand their business challenges as well as their unique opportunities. Sogeti and Microsoft have the proven expertise to ensure that the migration is optimized to each organization's business needs in a planned and rational way.

Why Migrate to Azure with Sogeti?

Utilizing automated migration tools Sogeti's team of experts, can help you organization migrate your applications and workloads with confidence. By migrating applications and workloads to the cloud, you can:

- Reduce IT infrastructure operations costs by >35%
- Improve security and availability for infrastructure operation
- Take advantage of better scalability with capacity elasticity, demand-driven by project

Sogeti's collaborative team of experts will work with you to properly assess and prioritize which workloads to move and when, depending on their complexity. Sogeti expertise will guide you in the careful planning of each migration so you can benefit from the better use of resources in running your applications in the cloud.

Customer success

A large American global food processing and commodities trading corporation benefits from Sogeti IaaS and PaaS offering leading to reduced time to migration and reduced costs by 30% while allowing high availability, scalability and security of the Data center.

The challenge:

The client wanted to upgrade databases running on SQL2008 version to newer versions on cloud (Azure) as the support for older version would soon cease, hence speed of the migration was key. The applications which were consuming these databases also needed to be migrated onto cloud.

The solution:

After completing a detailed assessment of the application landscape, the SQL databases were migrated to Azure. Using Sogeti's OneMigrate approach the customer was able to leverage the latest technology to achieve the following benefits:

- Over 300 GBs of data migrated onto the cloud
- Using pay as you use model and services like azure blob storage and containers, the customer realized significant savings and cost reductions
- Higher availability and scalability using Azure PaaS services
- Higher security using Azure AD
- Rehost and refactor to Azure IaaS VM using Azure Site Recovery and scripts

Sogeti OneMigrate Application Migration Process

Sogeti's cloud migration process works from discovery and assessment, to recommendation, and from recommendation to migrate and run. By putting their applications and data center on Azure, organizations can, rehost, refactor, revise or rebuild workloads to cloud IaaS or PaaS, depending on their business need.

Discover
Identify business requirements, application dependencies, and performance requirements

Assess
Analyze application environment to determine the best route: on-premises, hybrid, or cloud

Prepare
Group and map applications for cloud migration based on migration paths

Migrate
Utilizing automated migration tools, organizations can reduce costs by 30% or more

Run
Manage Multi-cloud environments from IaaS/ PaaS to container and serverless

Better together: Sogeti and Microsoft

As a Managed Gold Certified Partner with Microsoft, Sogeti offers customers a unique set of advantages with a presence in over 35 countries, 5 continents, and supported by 24,000 skilled Microsoft professionals across the Capgemini Group. Sogeti is one of a few Microsoft Partners that has achieved Gold Competencies in:

- Gold Cloud Platform
- Gold Cloud Productivity
- Gold Datacenter
