SPECTOREQ

API TO SPECIFICATION DOCUMENTATION

Problem

Lack of Standardized Documentation

> Inconsistent API documentation across different teams.

> Difficulty in understanding and using APIs due to poor documentation.

> Increased onboarding time for new developers.

Maintenance Challenges

> Hard to keep documentation up-to-date with API changes.

>Manual documentation processes are error-prone and time-consuming

Solution

Adopt Copilot based API Specification generation

> Standardization: Use Copilot to create a consistent and standardized format for API documentation.

>Automation: Generate documentation automatically from the API definition, reducing manual effort.

>Tooling Support: Leverage tools that support Copilot for generating client SDKs, server stubs, and interactive documentation.

Benefits

>Improved Consistency: Ensures all API documentation follows the same structure and format.

>Enhanced Usability: Provides clear and comprehensive documentation, making it easier for developers to understand and use the API.

>Efficient Maintenance: Simplifies the process of updating documentation as the API evolves.

About Capgemini

Capgemini is a global leader in partnering with companies to transform and manage their business by harnessing the power of technology. The Group is guided every day by its purpose of unleashing human energy through technology for an inclusive and sustainable future. It is a responsible and diverse organization of nearly 350,000 team members in more than 50 countries. With its strong 55-year heritage and deep industry expertise, Capgemini is trusted by its clients to address the entire breadth of their business needs, from strategy and design to operations, fueled by the fast evolving and innovative world of cloud, data, AI, connectivity, software, digital engineering, and platforms. The Group reported in 2022 global revenues of €22 billion.
