Azure Cloud Launchpad

CARBON60®
THE MANAGED CLOUD COMPANY

A Proven, Streamlined Azure Cloud Framework to Propel Your Cloud Forward

Accelerate your Azure cloud adoption, stay on budget with cost-effective solutions, and leverage best practices with Carbon60's signature product, Cloud Launchpad.

From global enterprises to startups, Azure Cloud Launchpad reduces common errors companies experience in establishing their cloud foundations. We help companies build the internal expertise and technical experience they need to own, operate, and continue to evolve on their own cloud environment to meet their new technology goals.

How does Cloud Launchpad Ensure Your Company is Successful in the Cloud?

Reduce the Cloud Learning Curve

We start your journey by educating your team on the five pillars of successful cloud adoption and provide personal coaching on best practices of cloud design & operations.

Lower the Barrier to Entry

Cloud adoption projects are often very expensive. Cloud Launchpad looks to change the game through a common baseline developed over hundreds of successful programs.

Reduce your Time to Market

We use best practices to reduce the timeline of your cloud adoption program and speed up the deployment of these solutions.

Avoid Costly Refactors

Rushing cloud adoption programs commonly leaves technical debt which often causes cloud security and scalability problems.

Accelerate Compliance

Distilled from many implementations, Cloud Launchpad accelerates HIPAA, SOC2 and PCI compliance.

You Own the Codebase

You own the Terraform codebase to extend far beyond the Cloud Launchpad.

How Carbon60 Delivers Azure Cloud Launchpad

STEP 1

Discovery

Carbon60 team learns about the business goals, technology in the current environment.

STEP 2

Cloud Launchpad Workshops

Carbon60 runs a series of training sessions to equip your teams with cloud best practices.

STEP 3

Cloud Launchpad Rollout

Carbon60 and your team collaborate to configure Cloud Launchpad. It takes as few as 2 days for the full rollout.

STEP 4

Hands-on Tutorial

Your team gets hands-on to build new resources on top of Cloud Launchpad code base using same infrastructure-as-code framework and process.

STEP 5

Cloud Roadmap

The final report will include both technical and business remediation with a prioritized list of risks and gaps along with an actionable roadmap.

STEP 6 - Optional

Remediate & Manage

Carbon60's team of dedicated Cloud experts can help remediate risks and provide ongoing 24x7 management of your cloud environment.
