CaRD Cloud Connector for SAP & Azure

...connecting world's best technologies

Combine standards

Use latest technology to connect Azure storage and SAP ArchiveLink

Scalable

The Azure Storage is scalable based on your required volume and your needs

Hot & Cold Space

Use hot space and cold space levels based on the Azure technology

Meta Data

The metadata can be customized in SAP using a graphical interface to drag & drop the customizing relations.No developments are required to define the meta data.

Cost effective

Use existing plans to manage your documents. Independent if the data has been generated within SAP (e.g. outgoing invoices) or if the data has been attached

S/4 HANA

The connector is compatible with S/4 HANA and Azure. It is also compatible with all Netwaever based SAP releases as well as with FIORI and other technologies.

SAP integrated

You can use the integrated SAP ECL viewer to display the files after checkin into Azure.

Custom URL

You can customize customer specific URLs to display the files in Azure.

Cloud based

We offer a cloud based version for Azure and a version which can run onPremise

Dashboard

We provide a dashboard to manage all features in SAP. It can also be used to monitor and simulate different processes.

Easy to setup

Our technology allows you to start with our connector in a short time period. This saves money and reduces the project duration

Enhancements

Flexible solution which can be enhanced by the customer, this allows us to offer best solutions
