CloudBeat

CloudBeat Software is designed to provide the best user experience in reviewing and analyzing cardiac data. It empowers medical staff to make a fast and proper diagnosis while patients comfortably continue with their daily life routines.

2 Dedicated Section for Event Analysis & Inspection

To further review your patient data, the Event View Page allows you to take accurate measurements, scan through ECG signals, display and adjust channels, add comments, and decide on the priority of events.

✓ Automatic Measurements Calculation
✓ Display of Arrhythmia Burden Graph
✓ Color-coded Arrhythmia Representation
✓ Minimum Loading Time
✓ Flexible Adjustment of Channels & Events
✓ Zooming Option for more Accurate Visualizations
✓ Fast & Easy Access to ECG Data
✓ Minute by Minute HR Graphical Display

1 A Triage Page that Displays Patient Events

The Triage Page displays events from all patients simultaneously in real-time, providing optimal efficiency in monitoring and accuracy in analysis.

All new events are marked with clinical and demographic information for easier processing. This will allow your staff to respond timely to all patients, and take immediate actions.
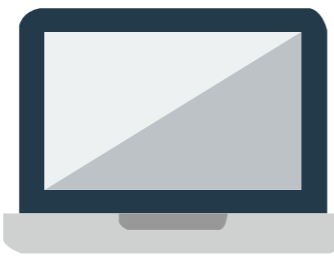

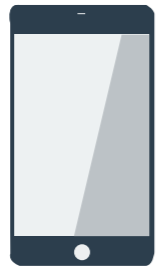

✓ Immediate Event Processing
✓ Quick & Accurate Arrhythmia Analysis
✓ Ability to Take Immediate Actions
✓ Higher Monitoring Efficiency

CardioDiagnostics collective expertise in **Cardiac Data Processing**, **Mobile Cardiac Telemetry Technologies** and **Smooth System Integration**, provides monitoring centers with a superior cardiac monitoring experience. CardioDiagnostics created the World's 1st HIPAA-Compliant, Hardware-Agnostic Cloud-based Cardiac Monitoring System, accessible from any **internet-connected device.**

3 Data Access from any Internet-Connected Device

Our Cloud-Based Software is accessible from any internet-connected device allowing you the flexibility to monitor your patient **anytime, anywhere**.

✓ Tablets   ✓ Laptops
✓ Phones   ✓ PCs

4 Simple and Intuitive Interface

The Intuitive Design of **CloudBeat** focuses on bringing you the ultimate user experience. With very little time, you will be able to view, inspect, and take immediate actions and hence significantly access all the needed patient information, systematically and timely.

It is uniquely designed to direct your attention to the most important data about your patients, saving you time and money.

CloudBeat offers three different User Views: **Administrator**, **Provider** and **Technician**.

✓ Easy Access to all Features & Functions
✓ One Step Process for Enrolling Patients
✓ Feature Rich Platform

5 Customizable Reports

To help you manage your reporting, CloudBeat provides you with a large variety of Clinical Report Templates for all types of reports. It also enables you to customize templates for each provider and medical center. You can even suggest your own report template that puts you in a competitive market position.

✓ Wide Range of Report Templates

✓ Customized Report for each study type (MCT, Wireless Events)

✓ Flexible Reporting Tools

✓ Wide Choice of Reporting Types (Single Event ,Daily, Weekly , End of Study Report)

✓ Created Reports Auto-Downloadable as PDFs for EMR storage

6 Customizable Software Workflow

At CardioDiagnostics, we understand your needs when using CloudBeat Software; we ensure that our services not only meet your expectations, but exceed them.

9 EMR Compatible

Our HL-7 Compatibility facilitates the delivery and usage of clinical information in medical centers. It allows your customers to export and import patient data **securely and directly** from and to EMR systems.

7 Hardware-Agnostic Platform

CloudBeat is compatible with Multiple Hardware Vendors, providing you with several hardware options.

10 Superior Data Loading and Performance

We understand the value of time during the monitoring process and the need to enhance the productivity of your staff. Therefore, our R&D Department Team continuously performs optimization processes to ensure the delivery of a superior software with optimal data loading efficiency.

8 HIPAA-Compliant

Our HIPAA Compliance guarantees that no patient data is ever lost. It ensures that all sensitive data is kept safe and secure **at all times, under any circumstances**.
All HIPAA requirements are fully implemented to ensure the confidentiality, the integrity, and the availabilty of patient data.
