

Manage. Track. Measure.

Forecast solution for quality measurement and reporting

Each year, as the stakes are raised toward achieving improved overall quality scores, health plan payers and providers struggle to keep pace with the ever-changing landscape of health plan quality improvement. Selecting the right partner can have a great impact on your quality ratings and overall financial performance.

Forecast reporting solution, offering NCQA certified measure results, empowers you to successfully execute key tasks and deliver the best results with a reporting engine that calculates HEDIS®, P4P, CMS STARS, QHP and other quality improvement measures.

- Intuitive solution for data integration, rate calculation, project management – all unified in a single toolset.
- Rate summary results and trending to your defined quality measure goals
- Navigable summary reports with member and claim event detail drill-down to inform stakeholders on key quality metrics and care gaps
- Compliant and non-compliant indicators across each member for overall population management
- Produce CAHPS® and QHP surveys with custom output as required.
- Hybrid sample generation and custom chase attribution logic
- Produce all regulatory files for final submission to NCQA, CMS and other required outputs
- Integrate with CareSeed's Harvest™ MRR software for seamless data flow of information of hybrid rates
- Accepts all source data for reporting, including standard and non-standard supplemental sources.

Prospective analysis and year round quality measurement

Forecast analytic engine provides year round actionable quality measure results to support your health engagement efforts to inform members on better health behaviors and reduce health care costs.

-  Tools to easily track and monitor rate changes and flag data points to focus on measures that are not in line with expected results
-  Track and measure prospective quality scores and monitor to performance goals
-  Inform your outreach campaigns and provider reporting with accurate and timely results that drive the most action to quality care goals.
-  Analyze data trends and impact to rates from all sources of data
-  Produce year to date rate summaries and benchmark results for trending based on population stratifications you choose
-  Incorporate off-season supplemental work to see real-time impact of your interventions outreach and data collection effort
