TRANSFORMING HEALTHCARE

MANAGE
TRACK
MEASURE

Manage your Medical Record Review Project
with defined work assignments, customized project workflows,
and an integrated scheduling tool.

Track yourprogress
with project completion reports, resource management tools,
project status updates.

Measure your results
with real-time rate and project status updates, and data completion and
abstraction integrity oversight

The annual medical record review project is one of the most time-consuming challenges of HEDIS® reporting process. It requires many resources contributing to the collection and abstraction of medical chart data working within an extremely aggressive timeline. Making sure you create a project that gets your team into the field early while providing careful monitoring of your compliance status is extremely important to your quality scores. In addition, you have to assure that you have implemented quality controls to track team performance and abstraction accuracy.

Harvest offers all aspects of hybrid collection and reporting support to include:

Project Dashboard includes key project indicators for project overview and real-time status.

Tools to manage and cleanup your practitioner data and reduce chart requests to inaccurate site locations.

Best-in-class data abstraction accuracy and scoring using robust overread quality checks and system reports to identify error rates.

Real-time measure scoring as data entry is input and saved in Harvest.

Customized provider notification letters, fax coversheets, and pull sheets to effectively communicate data gap requirements for each measure.
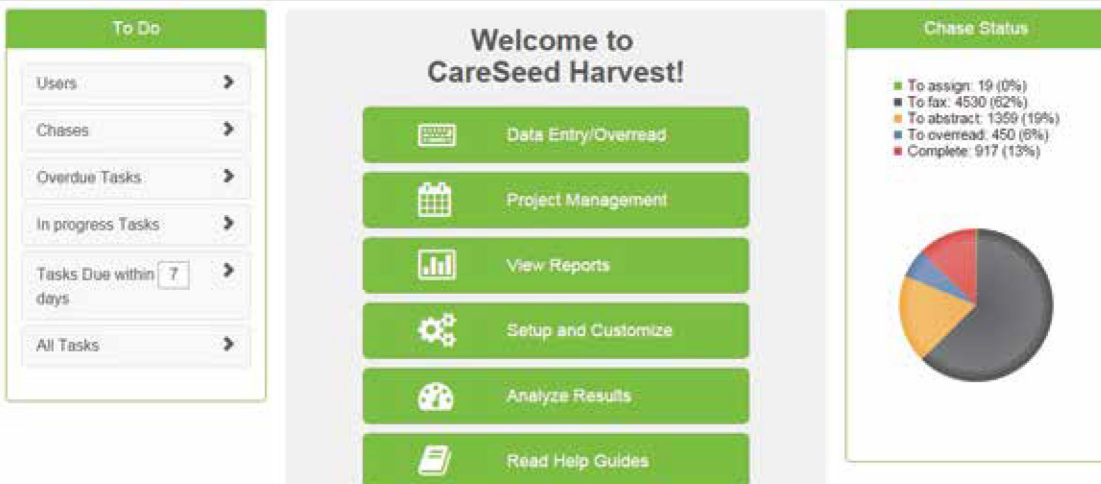

Upload, scan, or photograph medical chart documents directly to Harvest and automatically attach to the correct member/measure chase.

SmartChart™ annotation features allows reviewers to notate, and highlight specific chart findings that can be easily located and audited.

Create and track project assignments retrieval, review, and quality assurance resources to keep project moving forward to your timeline.
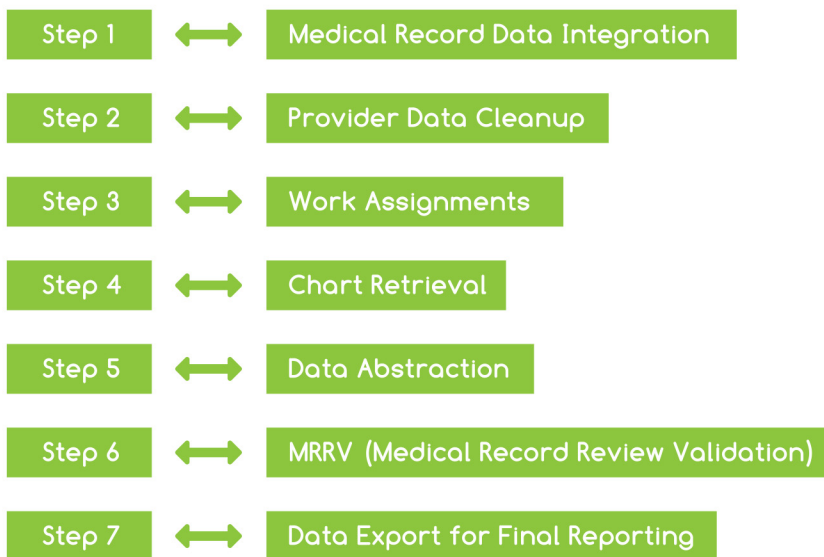

Find out how CareSeed's Harvest hybrid software solution can help you meet your overall project goals.

- Setup and Customize
- Analyze Results
- Read Help Guides

Chase Status

- To assign: 19 (0%)
- To fax: 4530 (62%)
- To abstract: 1359 (19%)
- To overread: 450 (6%)
- Complete: 917 (13%)

Medical Record Review Project Management

Each year, as the stakes are raised toward achieving improved overall quality scores, health plans struggle to keep pace with the ever-changing landscape of health plan quality improvement. A successful HEDIS® hybrid project can have a great impact on a health plan's quality ratings and overall financial performance. Harvest will operationalize your overall management of this time-sensitive quality reporting process.

Step 1	⟷	Medical Record Data Integration
Step 2	⟷	Provider Data Cleanup
Step 3	⟷	Work Assignments
Step 4	⟷	Chart Retrieval
Step 5	⟷	Data Abstraction
Step 6	⟷	MRRV (Medical Record Review Validation)
Step 7	⟷	Data Export for Final Reporting

Harvest Support

Harvest was designed for the project manager, data analyst, and clinical reviewer alike. While different roles contribute differently to the overall project, each relies on tools to effectively collaborate across the team. Support is customized relevant to these roles with product training, software support, and online documentation.

CareSeed will empower your team to successfully execute key tasks and deliver the best results toward your project timeline.
