Drive Revenue Growth & Operational Efficiency with Cargas & Business Central

About Cargas Systems:

Cargas, an employee-owned software and consulting company, provides ERP, CRM, and custom development solutions that simplify complex business operations. Through tailored technology implementations and expert consulting, we help businesses streamline processes, improve efficiency, and grow sustainably. Our team works closely with clients to ensure their systems are optimized for long-term success, emphasizing a collaborative approach rooted in shared success.

What we offer

With a long history of implementing Microsoft Dynamics GP and migrating legacy Microsoft products, Cargas brings deep expertise to Business Central implementations. Our proven project management approach ensures a smooth, step-by-step migration tailored to each customer's unique needs.

We guide customers through each phase, from planning to post go-live, with a focus on data migration, user training, and easy integration with other systems. Our team leverages best practices and deep knowledge of Microsoft's ecosystem, helping businesses unlock Business Central's full potential to drive efficiency, enhance productivity, and support long-term growth. Our commitment to client success ensures a lasting, valuable partnership.

What our customers are saying

"Cargas does the best job of communicating that I've ever seen and are knowledgeable, patient, and easy to work with."

- Tony Riley, Chief Financial Officer at Trussville

Why Business Central?

Modern Applications

Business Central offers powerful tools that connect with your existing systems, enabling a smooth digital transformation. With features like real-time data insights and mobile access, your team can work efficiently from anywhere, making processes more streamlined and effective.

Unified Data and Processes

By centralizing data, Business Central breaks down silos between departments, allowing teams to work together seamlessly. With one reliable view of business data and processes, everyone stays informed and aligned, driving better decision-making across the organization.

Actionable Intelligence

Business Central turns data into valuable insights. With built-in analytics and predictive tools, you can act on real-time information to make smarter decisions, anticipate needs, and respond to changes proactively.

Flexible and Scalable Environment

Business Central grows with your business. Its adaptable framework lets you easily extend functionalities, integrate new tools, and adjust to changing needs, ensuring that your business operations evolve smoothly over time.

Security and Compliance

Business Central provides a secure environment with built-in compliance features. Microsoft's advanced security measures protect your data, while regular updates ensure compliance with industry standards. With Business Central, your business can operate confidently, knowing that sensitive information is safeguarded and regulatory requirements are met.

Sales

Drive sales growth by managing leads, streamlining sales workflows, and gaining insights into customer behaviors—all from a unified, flexible platform.

Service

Improve customer service and response times by accessing comprehensive customer data, order history, and service requests.

Finance and operations

Optimize financial performance and streamline operations with robust accounting, budgeting, and reporting tools, designed to support real-time financial visibility and compliance.

Supply Chain & Inventory

Enhance supply chain visibility, manage inventory levels, and ensure timely deliveries with Business Central's end-to-end supply chain management capabilities.

Project Management

Stay on top of projects with Business Central's project management features, allowing for better resource planning, cost tracking, and real-time insights into project performance.

Microsoft Dynamics 365

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
