30-Day Fully Managed Microsoft Teams Rooms Proof of Concept

We understand the challenges of technology in the modern workplace.

Delivering the collaboration benefits of Microsoft Teams Rooms (MTR), our solutions can offer the flexibility that a traditional meeting space cannot, giving access to meetings on personal devices to facilitate the best possible meeting experience for every one of your users. Empowering employees to work from anywhere with a consistent experience across the workspaces is very much the focus of our design.

To assist with your digital transformation journey and help you make that choice between which MTR OEM provider, Carillion are happy to offer a 30 day fully managed end-to-end MTR Proof of Concept.

This service will give you the ability to heavily test the technology at a physical location of your choice, enabling you & your users to fully understand how the product works in your environment / use case. Upon taking part in the POC, you will receive the following:

- Choice of selecting any MTR OEM
- Free delivery, installation & decommissioning
- 30 Day testing at any UK office location
- The ability to purchase /or hassle-free return

Additional fee-based Project services we offer are as follows:

- Full Site Survey / Estate Audit
- Consultancy Services (AV / MTR)
- Technical Design & Integration
- Managed Support & Remote Monitoring Services
- CapEx / OpEx Flexible Finance Options

Not yet sure of which MTR OEM to choose? Unaware of which products are available from the OEM's?

Before you decide, why not visit us at our Maidenhead HQ Showcase Suite. We have setup different meeting room scenarios utilising the most up-to-date products from all leading manufacturers and welcome you in for a live product demonstration.

Carillion Communications' mission is to ensure every organisation in the public or private sector has access to superior communications, with exceptional audio-visual solutions that provide the power of connection through user-friendly controls.

Each system we design is engineered to be stress-free, delivering outstanding results that enrich client relationships, productivity and collaboration capacity, ultimately streamlining expenditure and lowering time constraints.

Carillion Communications is a Gold Microsoft Partner, an Authorised Microsoft Surface Provider, and an approved installer of hardware and software solutions including Poly, Crestron, Logitech, Neat, Barco, Pexip, Cisco, Sony, Samsung and Scala.
