Spyglass Cloud Security Assessment

Safeguard your assets with our comprehensive security offering

Catapult's **Spyglass Cloud Security Assessment** is a complete evaluation of your organization's cloud security posture centered around identity, data, devices, applications and access. This assessment includes an appraisal of your Microsoft 365 and Azure environments plus endpoint devices, providing a thorough analysis of your entire Microsoft cloud security environment as well as prioritization for next steps. Additionally, we include educational technical workshops that demonstrate the art of possible, provide best practices, use-cases, and deployment tips, and answer your questions.

SPYGLASS CLOUD SECURITY ASSESSMENT
Typical timeframe: 6 weeks

M365 Security Assessment	Azure Security Assessment	Endpoint Management Workshop
Microsoft 365 is a great first step toward modern workforce enablement, but compromised data and the leak of sensitive information could negatively affect business processes. Catapult security experts inspect your M365 tools and identify security features you may not realize you already own and should be using—providing you a new, meaningful view of your security landscape.	Azure affords businesses with a flexibility to envision, build and deploy wherever they want, using the tools, applications, and frameworks that best fit their needs. However, some businesses are hesitant or unwilling to adopt the cloud due to suspected security concerns. Our Azure Security Assessment offers actionable insight into your cloud security posture and how your Azure deployment can be made more safe and secure.	The remote worker paradigm demands that users be productive anywhere, on any device, without compromising IT security. Learn how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use.

ASSESSMENTS OR WORKSHOPS CAN BE DONE INDIVIDUALLY TO MEET YOUR NEEDS.

What you get:

- Comprehensive review of your current security and data compliance status
- Security findings briefing including immediate insight on risky activities detected within your environment
- Enablement of key Microsoft features and tools to help improve your security posture
- Security roadmap on next steps to ensure your environment is kept secure and compliant

Your involvement: 8 – 10 hours

ALSO AVAILABLE AS NEEDED

- App Security Assessment
- Data Security Assessment
- Dynamics Security Assessment
- On-Prem Security Assessment
