

Power Platform Quick Start

Build High-Value Solutions & Comply with IT and Business Policies

OVERVIEW

The popularity of the Power Platform has grown substantially in the last few years. Team members do not have to be coders or software programmers to build apps and flows if they use tools such as Power Apps, Power Automate, Power BI and Power Virtual Agents. Although the new generation of citizen developers is a productivity success for many companies, users could potentially have access to sensitive data if the right governance rules are not in place.

Catapult's Power Platform Quick Start will help you set the foundation and create a roadmap to establish a strong Power Platform strategy in as little as two weeks. Through a variety of workshops, our Productivity experts will deep dive into your environment, review your data loss prevention policies, explore your current security and licensing state, and help you create a road map that works for you. Our **Power Platform Quick Start** is perfect for organizations that are new to the Power Platform or need help improving the ability to govern their current environment.

WHAT YOU GET: Findings, recommendations, and prioritized roadmap that will take you to the next level.

LENGTH: 2-3 weeks

BENEFITS & VALUE

- Gain an understanding of what Power Platform is and how it can be utilized to help you grow in a controlled manner.
- Become familiar with best practices to improve overall Power Platform use and governance
- Get a detailed roadmap on implementing a successful strategy
- Get access to a team of Power Platform and productivity experts

POWER PLATFORM WORKSHOPS

Catapult will assess your environment to determine your baseline and place you in the correct workshop phase.

Environment Strategy Workshop

- Overview of Environments
- Application Lifecycle Management best practices
- Current environment state walkthrough
- Environment details report from Center of Excellence (CoE) to track usage

Data Loss Prevention Policies Workshop

- DLP Overview
- Categorize business data vs non-business data vs connectors to block
- Review DLP App from CoE to analyze impact

Security Workshop

- Security of apps and flows overview
- Best practices and recommendations
- Power Platform admin roles and responsibilities
- Guest user access

Licensing Management Workshop

- Licensing Overview
- Self-service licensing option
- Premium connector usage report from CoE to audit licensing

Road Map Planning Workshop

- Discuss how Power Platform and M365 fit in IT road map
- Identify potential PP configuration and solutions for the road map

Center of Excellence (CoE) Workshop

- Walkthrough of CoE Components
- Extend and modify components – discussion

Architect and Business Analyst Guidance Workshop

- Determine what to use for development: Power Platform vs. Dynamics vs. App Dev
- Decide what to manage: IT controlled solutions vs. end user-built solutions

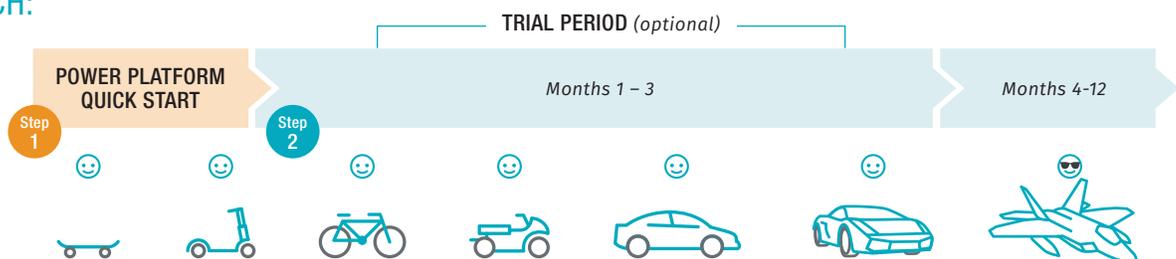

COST: \$12,000

WHAT HAPPENS NEXT?

Your next step is to implement the solution(s) on your roadmap and begin your tactical journey to a secure and governed Power Platform environment. Catapult can provide a team of Power Platform and Productivity experts to collaborate with your team to develop, test, and deploy your solutions
