

BASELINE SERIES

Microsoft 365 Branding Baseline

The CDI Microsoft 365 Branding Baseline customizes an organizations Microsoft 365 tenant with logos, colors, urls, privacy, and helpdesk/support information.

Branding often goes overlooked by organizations or is not fully implemented. The result is users are presented with generic login prompts which are easily duplicated by bad actors for use in phishing attacks. Providing proper branding makes it clear that users are logging into your organization. Custom branding also improves user experience and addresses legal and compliance concerns related to Terms of Use that many organizations require.

The Baseline Includes:

- Tenant Theme Configuration
- Update of organizational information.
- Update of Helpdesk, Support and Privacy URLs
- Customized Microsoft 365 portal login
- Customized End User Experience (Intune)
- Customized news feeds and delivery based on industry and topics
- Customized App Launcher settings
- Testing and Revision of all configurations
- Knowledge Transfer of settings and Office Configuration Portal
