BASELINE SERIES

Microsoft Teams Baseline

The CDI Microsoft Teams Baseline is a series of configurations meant to provide standardized configuration and provide a solid foundation for your organization to build Microsoft Teams usage and adoption from.

Configurations provided reduce potential shadow IT within an organization and helps protect user privacy. Organizations can also customize Teams applications and templates to ensure their workforce has the most relevant applications and data they need to increase their day-to-day productivity.

Configurations Include:

- Teams App Store Customization

- Teams Global Meeting Policy

- Creation of 2 Teams Templates

- Removal of irrelevant Teams Templates

- Configure of Live Events Global Policy

- Blocking of non-Microsoft applications

- Customize Teams Pinned applications

- Configure App submission Alerts

- Set Calling encryption policies

- Configuration of Default conference bridge
