

## Review & Validate Health of an existing Microsoft Endpoint Configuration Manager Environment

### Microsoft Endpoint Configuration Manager

#### Assessment & Health Check

This engagement is designed for CDI to evaluate an existing deployment of Microsoft Endpoint Configuration Manager (formerly SCCM) to verify the overall health of the deployment as well as identify areas of improvement in existing configuration or process, or methodologies.

Findings and recommendations will be reported back to the Customer in the form of a “recommendations and remediation “ deliverable as well as a findings review meeting with Customer stakeholders to present an opportunity for Customer Q&A.

#### Activities Include:

- Define future goals for device management and current state
- Define the organizations device security posture
- Showcase areas of improvement for managing the entire device lifecycle
- Assess configuration of Microsoft Endpoint Configuration Manager
- Findings review meeting with Customer stakeholders

#### CDI Solutions Pillars

Security

Modern Applications

Intelligent Operations

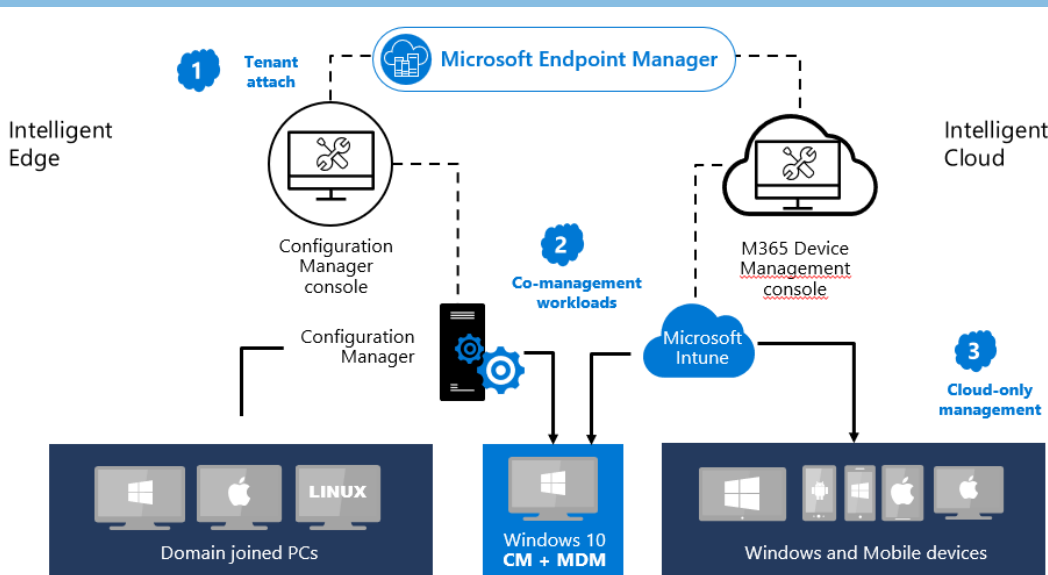

Digital Workflow

Digital Workspace

Hybrid Cloud Infrastructure
