AI Transformation Workshop – Preparing for AI & Microsoft 365 Copilot

M365 Copilot is the future of business. It's already revolutionizing content creation, employee productivity, data analysis, and decision-making. And it's only getting started.

Businesses that adopt generative AI early will gain a competitive advantage. They'll be able to save time and money, boost productivity, and make better decisions. And they'll be well-positioned for future growth and profitability.

CDW's three-stage M365 Copilot journey will help you prepare your business for the future of AI.

Stage 1: Create a strong zero-trust foundation

Protect your information and users with a zero-trust foundation that secures and manages identities, defends against threats on multiple platforms, and protects sensitive information across your estate.

Stage 2: Streamline endpoint management

Deliver the best experience for Windows 11 while protecting and managing endpoints, driving improved IT efficiency and protecting end-user devices from malicious attacks.

Stage 3: Empower users to drive productivity and collaboration

Provide users with the best-in-class applications, ensure that everyone is connected and working together, and prepare everyone to maximize the value of bringing AI into your business.

The Engagement

This multi-day engagement that will walk you through CDW's three-stage M365 Copilot journey help you develop a plan.
