

CDW SERVICES:

MICROSOFT AZURE BASIC JUMPSTART

GET THE MOST OUT OF YOUR MICROSOFT AZURE INVESTMENT

Organizations are always on the hunt for ways to reduce their capital expenses and minimize the endless addition of servers, storage and IT infrastructure needed to support their business demands. Microsoft Azure Infrastructure as a Service (IaaS) offers a scalable and flexible platform to provide server infrastructure on-demand without having to invest in hardware or software.

WHAT CAN CDW DO FOR ME?

The Microsoft Azure Basic Jumpstart will assist your organization with the selection and implementation of virtual networking technology. We will help you learn the best approaches to deploying virtual machines, including the associated cloud services and storage accounts. During the engagement, we will assist in planning, designing and building of an Azure subscription environment. This project serves as an accelerated Jumpstart, which will allow your organization to utilize your production, test and development environments. This service is best-suited for organizations that have yet to implement Azure and are looking for assistance in getting started. It is not intended to be a complete integration solution.

The engagement will be broken up into five segments:

- Azure Review Session
- Enable Azure Environment
- Site-to-Site (S2S) Networking
- Virtual Machine Build
- Closure Meeting

This offering will result in the development of a clear vision of the high-level solution goals and constraints. Together we will determine the appropriate network connectivity and configuration for the project. We will share our knowledge of industry-leading practices on the administration, operation and configuration of Azure, as well as identify business and technical requirements. Finally, we will implement and pilot the solution in the production environment.

THE BENEFITS

- Azure helps speed development, simplifies deployment and enables IT to respond quickly to changes in business and customer needs
- CDW consultants are experienced in designing and building Azure solutions, allowing you to get up and running quickly
- Gain knowledge and insight on the best use of Azure based on your business goals and requirements

WHY CDW?

CDW is uniquely qualified to design IT solutions that remove complexity and unnecessary costs from your organization. Our experts become part of your team providing the support you need, when and where you need it.

We can help you navigate Microsoft's robust array of solution offerings, including Azure. CDW is an end-to-end provider of cloud applications, solutions and services in public, private and hybrid cloud environments. Based on your business demands, we can help you plan, deliver and manage a flexible cloud solution tailored to your needs. We offer best-of-breed providers, risk mitigation strategies and dedicated, personalized expertise to deliver economic and operational benefits.

We get Microsoft Azure. And we can share our knowledge with you, so your organization can spend less time managing software and more time putting it to work.
