CDW Microsoft Fabric Services

Cloud

ACCELERATE YOUR DATA POTENTIAL WITH MICROSOFT FABRIC

Microsoft Fabric lets you manage and analyze all your data in one place, offering integrated analytics tools that support AI-driven solutions.

It provides a SaaS, lake-first platform for data integration, engineering, business intelligence and real-time analytics, allowing data professionals to handle every analytics workload efficiently.

SERVICES OVERVIEW

CDW's **Microsoft Fabric Readiness & TCO Assessment** helps organizations evaluate their current data environment – spanning legacy systems, tool sprawl and licencing costs – to assess readiness for Microsoft Fabric. It delivers a clear business case with a total cost of ownership (TCO) comparison, making it a low-risk, high-impact starting point for mid-market companies.

The **Microsoft Fabric Lakehouse PoC** offers a hands-on, short-term project that demonstrates Fabric's core capabilities, including data ingestion, transformation and querying within the Lakehouse. It builds technical confidence and showcases the simplicity and integration of Fabric's unified platform.

The **Integrated Analytics & Reporting Starter Package** delivers an end-to-end solution by connecting Fabric data to Power BI dashboards. It translates raw data into actionable insights, demonstrating immediate business value and highlighting Fabric's AI-powered reporting features.

Together, these offerings provide a strategic, low-friction path for Canadian mid-market companies to modernize their data strategy, reduce costs and unlock long-term value with Microsoft Fabric.

SERVICES FEATURES

- **Opportunity Identification:** Improve and innovate your data ecosystem, with data management practices for an optimized fabric data estate

- **Cost Optimization:** Evaluate current data product licencing migration and costs to optimize spend

- **Tailored Strategies:** Strategically align your business objectives to fabric implementation best practices with customized recommendations

- **Informed Decisions:** Empower stakeholders to make informed choices about technology investments and strategy with an understanding of your needs for the Fabric platform

CDW

WHAT WE DO

At CDW, our approach to Microsoft Fabric services commences with the identification of high-impact use cases and a thorough assessment of your existing data ecosystem to pinpoint potential gaps and opportunities. We evaluate architectural readiness and licencing frameworks to facilitate cost-effective solutions. Throughout each engagement, we offer customized guidance that strategically aligns business objectives with the capabilities of Fabric, enabling stakeholders to make well-informed decisions and accelerate the achievement of tangible value.

Use Case Identification — **Current State Evaluation** — **Architecture & Technology Evaluation** — **Licencing Cost Evaluation** — **Guidance & Roadmap**

INDUSTRY HIGHLIGHTS

- Retail - Unify sales, loyalty and inventory data for real time insights, enabling demand forecasting, dynamic pricing and fraud detection.

- Healthcare - Integrate EMR, wearable and operational data to predict readmissions, improve patient outcomes and streamline reporting.

- Manufacturing - Use IoT sensor data for predictive maintenance, reducing downtime and saving on repair costs.

- Finance - Detect fraud in real time with unified transaction analytics, reducing false positives and investigation time.

- Logistics - Consolidate supply chain data for live SLA dashboards and accurate delivery forecasting.

WHY CDW?

CDW Canada offers end-to-end data analytics solutions, guiding organizations through every stage of the data lifecycle. Leveraging expertise in Microsoft Fabric, Power BI and Azure, CDW delivers strategic, scalable services that align with your business goals. With a proven record in data modernization and AI readiness, CDW Canada ensures measurable outcomes and long-term value for Canadian organizations.
