Microsoft Azure

CDW

CDW Digital Velocity

Strengthen & enhance your IT security posture

with CDW's Azure Cloud Security Program

Summary

As cyber threats continue to evolve, securing your cloud environment is more critical than ever. CDW's Azure Cloud Security Program leverages the full spectrum of Microsoft Azure's security tools and best practices to protect your data, network, applications and infrastructure.

CDW Digital Velocity

Cloud security challenges

Pervasive infrastructure Sprawl

Assets and data are deployed across the hybrid infrastructure

Infrastructure is spread across multiple tenants and is not planned well

Lack of unified visibility and security strategy

Cloud security has become the second-most difficult hiring area

As cloud environments evolve and expand, organizations are struggling to find skilled, experienced cloud security professionals.

Misconfigured assets are the leading cause of cloud breaches, and without the right expertise, businesses cannot build a secure cloud environment that effectively protects critical data.

70% of organizations have had security issues due to a lack of collaboration

When it comes to cloud projects, security is often an afterthought to developers and business stakeholders. But this lack of communication can have large ramifications

Involving Security early on prevents rework and roadblocks and helps cloud projects stay on track.

⚠ Strained security teams, struggling to protect hybrid cloud

⚠ Misconfigurations leading to vulnerabilities and attacks

⚠ Cloud security experts are expensive and hard to find

⚠ Misconfigurations resulting in vulnerable data

⚠ Costs increased due to project delays or issues

⚠ Delays and issues leading to downtime.

CDW Digital Velocity

CDW key capabilities

Microsoft Cloud security tools demonstration

- Holistic review of Microsoft's Modern Cloud Security toolset in a CDW demo environment.

- Using Microsoft Azure Security Center to respond to cyberattacks.

- Explain the features of the CDW Azure Security Program, such as:
  - ✓ Threat defense
  - ✓ Compliance management
  - ✓ Identity and access management
  - ✓ Encryption
  - ✓ Backup & disaster recovery
  - ✓ Improved security posture
  - ✓ Reduced risk exposure

Azure Cloud Security Technical Assessment

- Learn how to leverage Microsoft Defender for Cloud and Sentinel.

- Conduct an in-depth analysis of your current security posture.

- Identification of vulnerabilities and potential threats.

- Customized recommendations for improvement and integration with your existing security tooling.

Cloud architecture, security services design and implementation

- CDW will design, configure, deploy and integrate your custom security recommendations.

- Shift left, integrating security standards into your build pipeline.

- Operationalize security policies and eliminate compliance drift.

CDW Digital Velocity

Program benefits

Enhanced security posture

- Proactively identify and mitigate risks before they become threats.
- Monitor your cloud environment for vulnerabilities, misconfigurations and malicious activities using tools such as Azure Security Center, Azure Defender for Cloud, Azure Firewall (WAF), etc.
- We also help you implement security best practices and comply with industry standards and regulations.

Improved compliance

- Comply with industry standards and regulations that apply to your business and industry (PCI DSS, HIPAA, GDPR, and NIST).
- Automate and enforce your cloud security policies and rules.
- Audit and document your cloud security compliance status and evidence.
- Leverage Azure's built-in compliance features and certifications, such as Azure Policy.

Customizable solutions

- Compliance controls
- Enhanced threat protection
- Advanced data protection

Comprehensive protection for your digital assets

CDW Digital Velocity

CDW helps you succeed!

With years of experience in cloud security, our team provides you with the most effective and innovative security solutions. CDW has over 100 certified cloud security specialists. We understand the complexities of the modern threat landscape and tailor our services to meet your unique needs. By partnering with us, you gain a trusted advisor committed to your security and success.

CDW Digital Velocity

Industry solution overview

Experience the seamless integration of advanced security solutions.

CDW's distinctive method of "showing before telling" helps our customers appreciate the benefits of the various Microsoft Cloud Security tools and how they can be integrated into their comprehensive security plan.

Advanced threat protection

Identity & access management

Access control

System oversight
