Microsoft Azure   **CDW**

Strengthen and enhance your IT security posture

with CDW's Azure Cloud Security Program

Summary

As cyber threats continue to evolve, securing your cloud environment is more critical than ever. CDW's Azure Cloud Security Program leverages the full spectrum of Microsoft Azure's security tools and best practices to protect your data, network, applications and infrastructure.

Key features

Optimize your digital defenses with robust solutions designed to safeguard against emerging risks while ensuring compliance with industry standards.

Microsoft Cloud Security tools overview
- Holistic review of Microsoft's Modern Cloud Security toolset in a CDW demo environment

Comprehensive security assessment
- In-depth analysis of your current security posture
- Identification of vulnerabilities and potential threats
- Customized recommendations for improvement and integration with your existing security tooling

Security services implementation
- CDW engineers configure, deploy, and integrate your custom security recommendations

Program benefits

Enhanced security posture
Proactively identify and mitigate risks before they become threats.

Improved compliance and governance
CDW's Azure Cloud Security Program will help you comply with the industry standards and regulations that apply to your business and industry, such as PCI DSS, HIPAA, GDPR and NIST.

Customizable solutions
Whether you need specific compliance controls, enhanced threat protection, or advanced data protection, we can provide a solution that fits your needs and integrates with your existing security solutions.

Why choose us?

With years of experience in cloud security, our team provides you with the most effective and innovative security solutions. CDW has over 100 certified cloud security specialists. We understand the complexities of the modern threat landscape and tailor our services to meet your unique needs. By partnering with us, you gain a trusted advisor committed to your security and success.
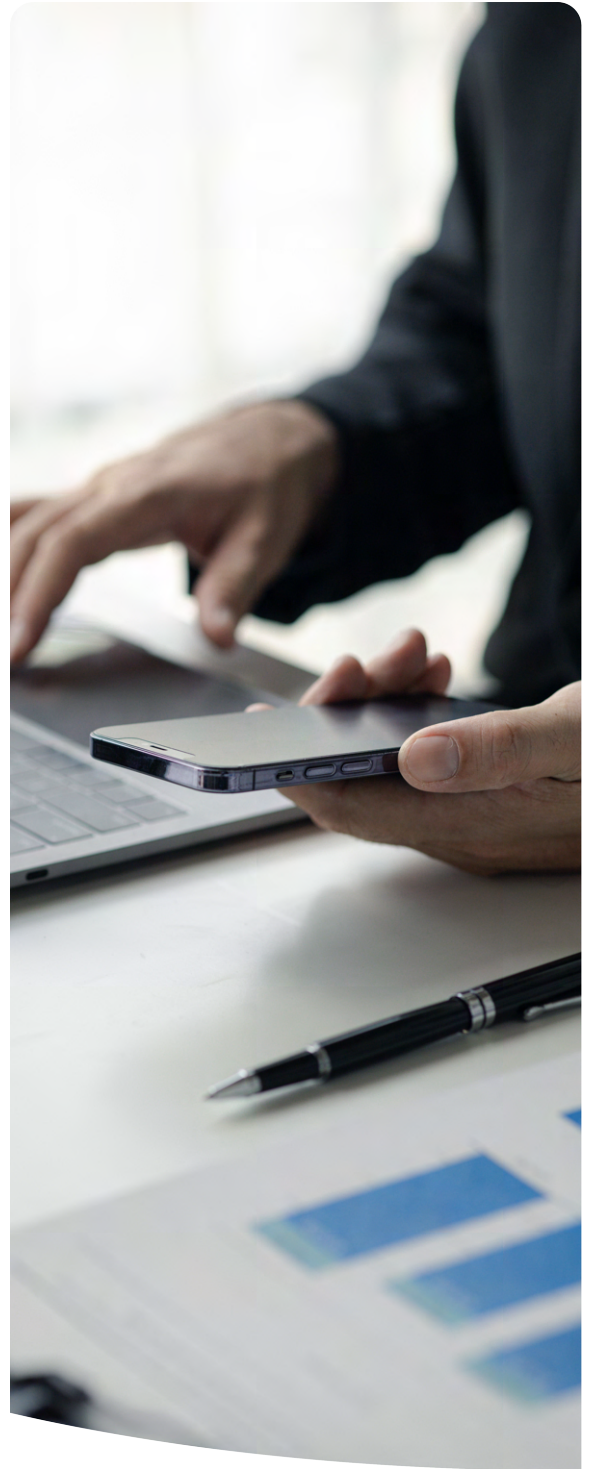

Industry solution overview

CDW's distinctive method of "showing before telling" helps our customers appreciate the benefits of the various Microsoft Cloud Security tools and how they can be integrated into their comprehensive security plan.
