

# Threat Protection Workshop

Learn how to put next-generation Microsoft Security tools to work for you.

## WORKSHOP HIGHLIGHTS

**Review your security goals and objectives**

Do you know how many phishing attacks your organization has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organization's cloud environment as secure as you think it is?

**Identify real threats and discover vulnerabilities in your environment**

### Improve your security posture with a Threat Protection Engagement

Organizations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Threat Protection Engagement.

**Map identified threats and vulnerabilities to specific solution recommendations**

We can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity and data, plus clarity and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

**Develop joint plans and next steps**

## WHY YOU SHOULD ATTEND

Given the volume and complexity of identities, data, applications, devices and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

- Identify current ongoing security threats and discover vulnerabilities in your environment
- Walk away with actionable next steps based on your specific needs and objectives
- Document your security strategy for the benefit of key stakeholders
- Better understand how to accelerate your security journey using the latest Microsoft Security tools

## WHAT TO EXPECT

During this workshop, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Analysis of cybersecurity threats that are found targeting your organization
- Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities
- Visibility into vulnerabilities to your Microsoft 365 cloud and on-premises environments to better understand, prioritize and address vulnerabilities and misconfigurations across your organization
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps
- Modular approach, allowing you to select three out of four available modules aligned to your needs and requirements

### Selectable Module

Unified SecOps Platform

### Selectable Module

Email Protection

### Selectable Module

Endpoint and Cloud Apps  
Protection

### Selectable Module

Microsoft Copilot for Security  
Demonstration

## WHO SHOULD ATTEND

The engagement is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

## WHY CDW?

- CDW is Microsoft's top partner in multiple areas ranging from technical proficiency to services capabilities, and we've earned that through training our people up to the gold standard level
- CDW Canada won the 2023 Microsoft Canada Modern Workplace Impact Award
