

WE UNDERSTAND THE CRUCIAL PROCESS OF EVALUATING YOUR ENVIRONMENT TO ENSURE DIGITAL SECURITY.

CDW Amplified™ Endpoint Assessment of Microsoft 365 Security

Unlock the full potential of your organization's digital security with our Assessment of Microsoft 365 Security service. As businesses face evolving cyber threats, our comprehensive assessment identifies vulnerabilities and strengthens defenses, ensuring a resilient Microsoft 365 environment. Expect enhanced threat protection, improved compliance and fortified data integrity as key business outcomes, empowering your enterprise to thrive securely in the digital landscape.

Assessment of Microsoft 365 Security can help you achieve:

Operational Efficiencies

Reliability

Reduced Risk

Orchestrating the Right Solution

CDW's Assessment of Microsoft 365 Security service offers a comprehensive range of options to address various security needs within your organization's Microsoft 365 environment. Our service is designed to provide thorough evaluations, actionable insights and expert recommendations to bolster your security posture.

- **Tailored assessments:** We offer three distinct types of assessments: Essential Security Assessment, Comprehensive Security Assessment and Advanced Security Assessment — each tailored to address different levels of security requirements.
- **In-depth evaluation:** Our assessments involve detailed discussions, analyses and reviews of your Microsoft 365 security landscape, including current settings, configurations and threat detection capabilities.
- **Expert recommendations:** We provide invaluable recommendations to fortify your security posture, identifying critical vulnerabilities and suggesting enhancements to security controls and best practices.

CDW's expertise in cybersecurity and Microsoft solutions sets us apart in delivering best-in-class services for assessing Microsoft 365 security. We ensure that our assessments are conducted by knowledgeable professionals with extensive experience in the field. Additionally, our customized approach ensures that every organization's unique security needs are addressed, providing tailored recommendations to meet specific requirements and challenges.

Our service delivers comprehensive support throughout the assessment process, from initial discussions to final recommendations. We provide detailed assessment reports outlining current security settings, vulnerabilities and actionable insights. Additionally, we offer tailored suggestions for transitioning to advanced Microsoft 365 plans where applicable. Our team of cybersecurity experts conducts in-depth discussions and analyses, ensuring that you receive thorough and actionable insights. Furthermore, we provide comprehensive reviews of Microsoft 365 tenant security settings, benchmarking them against industry standards to ensure alignment with best practices. CDW's Assessment of Microsoft 365 Security service empowers your organization to proactively strengthen its security defenses, mitigate risks and optimize its Microsoft 365 investment. Trust CDW to orchestrate the right solution for your Microsoft 365 security needs.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

CDW + MICROSOFT + SECURITY

CDW's unwavering commitment to excellence and strategic partnership with Microsoft uniquely position us as the go-to provider for the Assessment of Microsoft 365 Security. Our extensive experience in delivering tailored security solutions, combined with an in-depth understanding of Microsoft's ecosystem, ensures that our assessments are not just comprehensive but also finely tuned to the nuances of your organizational needs. CDW's collaborative approach with Microsoft allows us to offer innovative and effective security measures, aligning seamlessly with the latest advancements in the Microsoft 365 environment. Choose CDW for a trusted ally that not only understands the intricacies of Microsoft's technologies but also leverages this partnership to deliver unparalleled value and protection for your digital assets.

Services Overview

The following services are included with an Assessment of Microsoft 365 Security:

Service	Included
Assessment: Evaluating the existing environment and readiness for Microsoft 365 security products and features, which will typically include analyzing the current device management solution and security protocols throughout your environment.	✓
Envisioning: Working with your team to understand how they work today, and how Microsoft 365 security products fit into your workflows by developing high-value use cases.	✓
Planning and design: Workshops with your administration team and project stakeholders to ensure that Microsoft 365 security features meet all of the necessary requirements to support the end-state environment.	✓
Success planning: Working with the appropriate project team members and stakeholders in a series of formal and informal sessions to discuss the development and execution of the customer training, communication and support requirements that will benefit the organization most.	✓

CUSTOMER SUCCESS STORY

Organization: Enterprise customer with more than 15,000 employees

CHALLENGE: The customer faced challenges in navigating the diverse amount of Microsoft security products, resulting in inefficiencies and potential security gaps. The complexity of their environment demanded a tailored approach to identify and mitigate vulnerabilities while ensuring optimal utilization of Microsoft 365 security features.

SOLUTION: The CDW consultant engineering team undertook an assessment of the customer's Microsoft security products, providing an in-depth analysis of their existing security measures. A customized approach was crafted, recommending enhancements and optimizations to leverage the full potential of Microsoft 365 security. This included advanced threat detection, data loss prevention and access controls.

RESULT: Following the implementation of the recommended solutions, the customer's solutions experienced a notable enhancement in their overall security posture. A 25% reduction in security vulnerabilities was achieved, bolstering their resilience against potential cyber threats. The streamlined and optimized use of Microsoft 365 security products not only fortified their defenses but also streamlined operational efficiency. The customer now navigates through their digital landscape with heightened confidence and a robust security framework.
